Management's Discussion and Analysis of Financial Condition and Results of Operations

(dollars in thousands, except as noted)

The following discussion reviews the financial condition and results of operations of the Farm Credit Bank of Texas (bank) for the nine months ended September 30, 2014. These comments should be read in conjunction with the accompanying financial statements and footnotes, along with the 2013 Annual Report to shareholders. The accompanying financial statements were prepared under the oversight of the bank's audit committee.

The bank is a member of the Farm Credit System (System), a nationwide network of cooperatively owned financial institutions established by and subject to the provisions of the Farm Credit Act of 1971, as amended, and the regulations of the Farm Credit Administration (FCA) promulgated thereunder.

The United States is currently served by three Farm Credit Banks (FCBs), each of which has specific authority to fund affiliated associations and other financing institutions (OFIs) making loans to agricultural producers, farm-related businesses and rural homeowners within a regional chartered territory (or district), and by one Agricultural Credit Bank (ACB), which has the lending authority of an FCB within its chartered territory and nationwide authority limited to finance agricultural cooperatives and rural utilities. The FCBs and the ACB are collectively referred to as "System banks." As FCBs, the primary purpose of the System banks is to serve as a source of funding for System associations within their districts. The System associations make loans to or for the benefit of borrowers for qualified purposes.

The bank and its affiliated associations collectively are referred to as the "district." At September 30, 2014, the bank provided financing to 15 district associations and certain other financing institutions.

RESULTS OF OPERATIONS

Net Income

Net income for the quarter ended September 30, 2014, was \$55,087, an increase of \$11,585, or 26.6 percent, over the same period of 2013. The increase in net income consisted of a \$6,601 decrease in provision for credit losses, a \$6,367 increase in net interest income and a \$435 increase in noninterest income, offset by a \$1,818 increase in noninterest expense.

Net income for the nine months ended September 30, 2014, was \$146,381, an increase of \$6,506, or 4.7 percent, over the same period of 2013. The increase in net income consisted of a \$12,441 decrease in provision for credit losses and a \$4,252 increase in net interest income, offset by a \$5,813 decrease in noninterest income and a \$4,374 increase in noninterest expense.

Net Interest Income

Net interest income for the three months ended September 30, 2014, was \$59,628, an increase of \$6,367, or 12.0 percent, from the three months ended September 30, 2013. The increase in net interest income for the quarter ended September 30, 2014, was attributable to a volume increase of \$1.410 billion in the bank's average earning assets and a 5-basis-point increase in the bank's interest rate spread to 138 basis points. Effective interest rates on earning assets decreased 1 basis point from the third quarter of 2013 to the third quarter of 2014, while effective rates on interest-bearing liabilities decreased 6 basis points. The increase in the bank's average earning assets included growth in its direct notes from associations, investment portfolio and capital market loans.

Net interest income for the nine months ended September 30, 2014, was \$167,711, an increase of \$4,252, or 2.6 percent, over the same period of 2013. The increase in net interest income was attributable to a volume increase of \$1.179 billion in the bank's average earning assets, offset by a 7-basis-point decrease in the bank's interest rate spread to 133 basis points. The interest rate spread decrease included a 9-basis-point decrease in the effective rate on average earning assets and a 2-basis-point decrease in the effective rate on average interest-bearing liabilities for the nine months ended September 30, 2014, compared to the nine months ended September 30, 2013. The decline in effective rates on earning assets is reflective of the low interest rate environment combined with competitive pressures. The increase in the bank's average earning assets included growth in its direct notes from associations, investment portfolio and capital market loans. Interest expense for the first nine months of 2014 reflected a \$469 decrease in concession expenses recognized on callable debt as a result of a \$646.9 million decrease in debt called in the first nine months of 2014, compared to the same period in 2013. The bank called \$2.02 billion in debt in the nine months ended September 30, 2014.

Provision for Credit Losses

The bank's negative provision for credit losses for the quarter ended September 30, 2014, totaled \$5,157, a decrease of \$6,601 from the third quarter of 2013. The provision for the quarter consisted of \$4.8 million in negative specific provision and \$342 in negative general provision. The reduction in specific provision included a \$4.2 million negative provision resulting from the payoff of a nonaccrual dairy loan. The reduction in general provision for credit losses included the effects of repayments and credit upgrades on accrual loans.

The bank's negative provision for credit losses for the nine months ended September 30, 2014, totaled \$5,852, a decrease of \$12,441 from the \$6,589 provision for credit losses recorded in the first nine months of 2013.

Noninterest Income

Noninterest income for the quarter ended September 30, 2014, was \$9,345, an increase of \$435, or 4.9 percent, over the same period of 2013. The increase for the third quarter of 2014 over the same period of 2013 was due mainly to a \$1,420 increase in loan-related fee income, a \$146 increase in patronage income, and a \$100 increase in all other noninterest income elements, offset by a \$1,140 decrease in fair value on loans purchased in the secondary market due primarily to changes in the interest rate market and a \$91 decrease in services billed to associations. The bank has elected a fair value option for financial presentation purposes on certain loans purchased on the secondary market at a significant premium. The fair value option provides an irrevocable option to elect fair value as an alternative measurement for selected financial instruments. As discussed in the "Investments" section of this Management's Discussion and Analysis, the bank performs other-than-temporary impairment (OTTI) assessments on investment securities based on evaluations of both current and future market and credit conditions at each quarter end. The bank recorded no credit losses for OTTI investment securities during the third quarters of 2013 or 2014.

Noninterest income for the nine months ended September 30, 2014, was \$29,046, a decrease of \$5,813, or 16.7 percent, over the same period of 2013. The decrease was due mainly to a \$5,987 decrease in loan-related fee income, a \$202 decrease in fair value on loans previously purchased in the secondary market, a \$200 decrease in all other income items, collectively, and a \$65 decrease in patronage income, offset by a \$498 increase in services billed to associations, and a \$143 decrease in credit losses realized on OTTI investment securities. The decrease in loan-related fee income is primarily due to a nonrecurring \$6.0 million prepayment fee received in the first quarter of 2013. The bank recorded no credit losses for OTTI investment securities in the nine months ended September 30, 2014.

Noninterest Expense

Noninterest expense for the three months ended September 30, 2014, was \$19,043, an increase of \$1,818, or 10.6 percent, over the same period of 2013. The increase was attributable to a \$571 increase in salaries and employee benefits, a \$475 increase in premiums assessed by the Farm Credit System Insurance Corporation (FCSIC), a \$459 increase in occupancy and equipment expenses, a \$277 increase in other operating expenses, and a \$36 increase in losses on other property owned (OPO). The \$571 increase in salaries and benefits included a \$516 increase in compensation and related payroll taxes. Premiums to the FCSIC, assessed on average System debt outstanding, increased from 10 basis points in 2013 to 12 basis points in 2014. The increase in occupancy and equipment included a \$514 increase in computer expenses. The increase in OPO included a \$96 increase in carrying value adjustments on the underlying collateral, offset by a \$65 decrease in net expenses on OPO.

Noninterest expense for the nine months ended September 30, 2014, was \$56,228, an increase of \$4,374, or 8.4 percent, over the same period of 2013. The increase was attributable to a \$1,875 increase in occupancy and equipment expenses, a \$1,599 increase in salaries and employee benefits, a \$1,245 increase in premiums assessed by the FCSIC and an \$850 increase in other operating expenses, offset by a \$1,195 decrease in losses on other property owned (OPO). The increase in occupancy and equipment included a \$2,171 increase in computer expenses. The \$1,599 increase in salaries and benefits included a \$1,334 increase in compensation and related payroll taxes. Premiums to the FCSIC, assessed on average System debt outstanding, increased as a result of the rate increase from 10 basis points in 2013 to 12 basis points in 2014. The decrease in losses on OPO included an \$824 decrease in carrying value adjustments on the underlying collateral, a \$185 increase in net gains on disposition of OPO and a \$186 decrease in net expenses on OPO.

Key results of operations comparisons:

	Annualized for the Nine Months Ended 9/30/2014	Annualized for the Nine Months Ended 9/30/2013
	<hr/>	<hr/>
Return on average assets	1.18%	1.21%
Return on average shareholders' equity	13.37%	13.39%
Net interest income as a percentage of average earning assets	1.40%	1.47%
Charge-offs, net of recoveries, to average loans	0.03%	0.10%
Operating expenses as a percentage of net interest income and noninterest income	28.74%	25.70%
Operating expenses as a percentage of average earning assets	0.47%	0.46%

Other Comprehensive Loss

Other comprehensive loss consists of certain gains, losses or costs for which values are included in assets or liabilities on the balance sheets, but which have not yet been recognized in earnings. In the balance sheet, they are included in accumulated other comprehensive loss in the shareholders' equity section. For the bank, these elements include unrealized gains or losses on the bank's available-for-sale investment portfolio, elements of certain postretirement benefit changes, and changes in the value of cash flow derivative instruments.

The table below summarizes the changes in elements included in other comprehensive income (loss) for the nine months ended September 30:

	Nine Months Ended September 30,	
	2014	2013
Change in unrealized losses on available-for-sale securities		
Net decrease (increase) in unrealized losses on investment securities	\$ 9,035	\$ (53,968)
Decrease in noncredit portion of other-than-temporary impairment (OTTI) losses	59	1,139
Reclassification adjustment for OTTI credit losses included in net income	-	143
Net change in unrealized losses on securities	9,094	(52,686)
Change in postretirement benefit plans		
Amounts amortized into net periodic expense:		
Amortization of prior service credits	(144)	(143)
Amortization of net losses	-	13
Net change in postretirement benefit plans	(144)	(130)
Change in cash flow derivative instruments		
Unrealized (losses) gains on interest rate caps	(608)	145
Reclassification of loss recognized in interest expense	1,917	1,067
Net change in cash flow derivative instruments	1,309	1,212
Other comprehensive income (loss)	\$ 10,259	\$ (51,604)

FINANCIAL CONDITION

Loan Portfolio

Gross loan volume at September 30, 2014, was \$12,704,592, an increase of \$925,851, or 7.9 percent, compared to \$11,778,741 at December 31, 2013. The increase in the loan portfolio is attributable to growth in the bank's direct loans to associations and an increase in the bank's capital markets loan portfolio.

The bank's capital markets loan portfolio predominantly includes participations, syndications and purchased whole loans, along with other financing structures within our lending authorities. The bank also refers to the capital markets portfolio as participations purchased. In addition to purchasing loans from our district associations, which may exceed their hold limits, the bank actively pursues the purchase of participations and syndications originated outside of the district's territory by other System institutions, commercial banks and other lenders. These loans may be held as earning assets of the bank or sub-participated to the associations or to other System entities.

In April 2014, the bank purchased \$4,228 in loan participations and \$9,052 in Federal Agricultural Mortgage Corporation (Farmer Mac) guaranteed agricultural mortgage-backed securities (AMBS) from one association in Capitalized Participation Pool (CPP) transactions. As a condition of the transactions, the bank redeemed stock in the amount of 2.0 percent of the par value of the loans purchased, and the associations bought bank stock equal to 8.0 percent of the purchased loans' par value and 1.6 percent of the AMBS' par value. CPP loans held at September 30, 2014, totaled \$36,822. The balance of the AMBS CPP was \$88,647 at September 30, 2014.

Loans classified under the Farm Credit Administration’s Uniform Loan Classification System as “acceptable” or “other assets especially mentioned” were 98.7 percent of total loans and accrued interest at September 30, 2014, compared to 98.2 percent at December 31, 2013. The increase included the effects of improvements in the credit quality of the bank’s capital markets loan portfolio, an increase in the bank’s direct notes from associations and repayments on nonaccrual loans.

The table below summarizes the balances of the bank’s high-risk assets at September 30, 2014, compared to the balances at December 31, 2013:

	September 30, 2014	Increase (Decrease)		December 31, 2013
		\$	%	
Nonaccrual loans	\$ 7,536	\$ (20,596)	(73.21) %	\$ 28,132
Formally restructured loans	12,341	(141)	(1.13)	12,482
Total impaired loans	19,877	(20,737)	(51.06)	40,614
Other property owned, net	10,839	(2,973)	(21.52)	13,812
Total high-risk assets	\$ 30,716	\$ (23,710)	(43.56) %	\$ 54,426

The decrease in nonaccrual loans was due mainly to repayments of \$22,636 and net charge-offs of \$2,304, net of \$4,355 in advances on nonaccrual loan committed lines of credit. During the nine months ended September 30, 2014, the bank recorded charge-offs totaling \$2,362 against the allowance for loan losses due to known losses on loans in the ornamental nursery products and ethanol sectors. At September 30, 2014, \$2.4 million, or 31.6 percent, of the bank’s nonaccrual loans were considered current as to principal and interest. Continued satisfactory payment performance on these loans may indicate potential for a return to accrual status. At September 30, 2014, the bank did not have any nonaccrual loans on which cash payments are recognized as interest income, compared to \$1.5 million at December 31, 2013. The decrease in other property owned included a \$2,813 net decrease in real estate properties held, and a \$160 decrease in the carrying value adjustments on other property owned. The decrease in properties held resulted primarily from the disposal of two properties, resulting in net gains of \$453 on dispositions.

Impaired loans, consisting of nonaccrual loans and formally restructured loans, and loans 90 days past due and still accruing interest, constituted 0.2 percent of gross loans at September 30, 2014, and 0.3 percent of gross loans at December 31, 2013.

At September 30, 2014, the bank had reserves for credit losses totaling \$11,033, including an allowance for loan losses of \$6,449 and a reserve for losses on unfunded commitments of \$4,584 related to the bank’s capital markets loan portfolio. The allowance for loan losses of \$6,449 equated to 0.05 percent of total loans outstanding and 0.1 percent of capital market loans outstanding. The \$4,584 reserve for losses included a general reserve for losses on unused loan commitments, a general reserve for losses on letters of credit and a specific reserve related to one letter of credit, representing management’s estimate of probable credit losses related to letters of credit.

The allowance for loan losses as a percentage of impaired loans was 32.4 percent as of September 30, 2014, as compared to 33.6 percent as of December 31, 2013. The nature of the collateral supporting many of the impaired loans (primarily first lien real estate) is considered in the determination of necessary allowances for loan losses.

Liquidity and Funding Sources

Cash and investment securities totaled \$4,369,175, or 25.3 percent, of total assets at September 30, 2014, compared to \$4,262,116, or 26.3 percent, at December 31, 2013, an increase of \$107,059, or 2.5 percent. At September 30, 2014, the bank’s cash balance was \$451,671, a \$150,781 decrease from

December 31, 2013. Cash held at the Federal Reserve Bank at September 30, 2014, totaled \$439,576, compared to \$572,754 at December 31, 2013. Levels of cash and other highly liquid assets are maintained to meet loan demand, debt servicing and other liquidity needs. At September 30, 2014, the bank had 238 days of liquidity to cover maturing debt obligations. Interest-bearing liabilities, consisting of bonds, notes and subordinated debt, increased by \$987,278, or 6.7 percent, from December 31, 2013, to September 30, 2014.

Investments

The bank's investments are all considered available for sale, and include a liquidity portfolio and a portfolio of other investments. The liquidity portfolio had a fair value of \$3.81 billion at September 30, 2014, and consisted primarily of federal agency-guaranteed collateralized mortgage-backed securities, corporate debt, agency-guaranteed debt, asset-backed securities and other collateralized mortgage-backed securities. The bank's other investments, totaling \$88.6 million, consisted of Federal Agricultural Mortgage Corporation (Farmer Mac) guaranteed agricultural mortgage-backed securities (AMBS) purchased from district associations. The Farmer Mac securities are backed by loans originated by the associations and previously held by the associations under the Farmer Mac long-term standby commitment to purchase agreements.

Farmer Mac is a government-sponsored enterprise and is examined and regulated by FCA. It provides a secondary market for agricultural and rural home mortgage loans that meet certain underwriting standards. Farmer Mac is authorized to provide loan guarantees and to be a direct pooler of agricultural mortgage loans. Farmer Mac is owned by both System and non-System investors, and its board of directors has both System and non-System representation. Farmer Mac is not liable for any debt or obligation of any System institution, and no System institution other than Farmer Mac is liable for any debt or obligation of Farmer Mac.

The majority of the bank's mortgage-backed securities were federal agency-guaranteed collateralized mortgage-backed securities, including Government National Mortgage Association (GNMA), Federal National Mortgage Association (FNMA) and Federal Home Loan Mortgage Corporation (FHLMC) securities.

The following table summarizes the bank's liquidity portfolio holdings:

	September 30, 2014		December 31, 2013	
	<u>Amortized Cost</u>	<u>Fair Value</u>	<u>Amortized Cost</u>	<u>Fair Value</u>
Agency-guaranteed debt	\$ 137,333	\$ 133,365	\$ 135,738	\$ 130,024
Corporate debt	223,966	224,073	250,312	249,579
Federal agency-guaranteed collateralized mortgage-backed securities:				
GNMA	1,643,857	1,633,720	1,690,952	1,680,426
FNMA and FHLMC	1,758,251	1,753,586	1,431,037	1,421,578
Other collateralized mortgage-backed securities	6,796	6,614	7,736	7,529
Asset-backed securities	56,681	56,730	51,320	51,296
Total available-for-sale investments	<u>\$ 3,826,884</u>	<u>\$ 3,808,088</u>	<u>\$ 3,567,095</u>	<u>\$ 3,540,432</u>

The bank's other investments portfolio consisted of Farmer Mac AMBS securities as follows:

	September 30, 2014		December 31, 2013	
	<u>Amortized Cost</u>	<u>Fair Value</u>	<u>Amortized Cost</u>	<u>Fair Value</u>
Agricultural mortgage-backed securities	\$ 91,059	\$ 88,647	\$ 101,063	\$ 97,423

During the nine months ended September 30, 2014, there was a decrease in unrealized losses on investments totaling \$9,095, due primarily to recent changes in the interest rate environment.

At September 30, 2014, the bank had one asset-backed security (ABS) that was considered other-than-temporarily impaired (OTTI). During the nine months ended September 30, 2014, there were no credit losses recognized on OTTI investments. The non-credit-related unrealized loss on the bank's other-than-temporarily impaired investment, totaling \$59, is included in accumulated other comprehensive loss. The bank performs other-than-temporary impairment assessments on investment securities based on evaluations of both current and future market and credit conditions at each quarter end. The process for evaluation of impairment of investments is more fully discussed in Note 2, "Investments."

FCA regulations define eligible investments by specifying credit rating criteria, final maturity limit, percentage of investment portfolio limit and certain other requirements for each investment type. At the time the investments are purchased, they must be highly rated by at least one Nationally Recognized Statistical Rating Organization (NRSRO), such as Moody's Investors Service, Standard & Poor's or Fitch Ratings. U.S. Treasury securities, U.S. agency securities (except mortgage securities) and other obligations fully insured or guaranteed by the U.S. government, its agencies, instrumentalities and corporations are considered eligible investments under the FCA's regulations, even if downgraded. Under the regulations, these investments have no final maturity limit, no credit rating requirement by NRSROs, no investment portfolio limit or other requirements. If an investment no longer meets the credit rating criteria, the investment becomes ineligible. To date, the FCA has not required disposition of any of these securities. While these investments do not meet the FCA's standards for liquidity, they are included in the net collateral calculation at the lower of market or book value.

At September 30, 2014, the bank held seven investments that were ineligible for liquidity purposes by FCA regulations due to credit ratings that were below AAA rating by all NRSROs. Those ineligible securities had an amortized cost basis of \$7,664 and a fair value of \$7,488 at September 30, 2014.

The following table sets forth the bank's portfolio of liquidity investments at fair value by credit rating:

	Eligible			Ineligible				Total
	AAA/Aaa	AA/Aa	Split Rated	AA/Aa	A/A	BBB/Baa	CCC/Caa	
<u>September 30, 2014</u>								
Agency-guaranteed debt*	\$ -	\$ -	\$ 133,365	\$ -	\$ -	\$ -	\$ -	\$ 133,365
Corporate debt	-	74,954	149,119	-	-	-	-	224,073
Federal agency collateralized mortgage-backed securities*								
GNMA	-	-	1,633,720	-	-	-	-	1,633,720
FNMA and FHLMC	-	-	1,753,586	-	-	-	-	1,753,586
Other collateralized mortgage-backed securities	-	-	-	2,419	-	4,195	-	6,614
Asset-backed securities	55,857	-	-	-	563	-	310	56,730
Total	\$ 55,857	\$ 74,954	\$ 3,669,790	\$ 2,419	\$ 563	\$ 4,195	\$ 310	\$ 3,808,088
<u>December 31, 2013</u>								
Agency-guaranteed debt*	\$ -	\$ -	\$ 130,024	\$ -	\$ -	\$ -	\$ -	\$ 130,024
Corporate debt	-	75,832	173,747	-	-	-	-	249,579
Federal agency collateralized mortgage-backed securities*								
GNMA	-	-	1,680,426	-	-	-	-	1,680,426
FNMA and FHLMC	-	-	1,421,578	-	-	-	-	1,421,578
Other collateralized mortgage-backed securities	-	-	-	2,696	-	4,833	-	7,529
Asset-backed securities	50,138	-	-	-	882	-	276	51,296
Total	\$ 50,138	\$ 75,832	\$ 3,405,775	\$ 2,696	\$ 882	\$ 4,833	\$ 276	\$ 3,540,432

*Due to credit rating actions in 2011 which downgraded the credit rating of the U.S. government from "AAA" to "AA+" and also lowered the long-term credit ratings of government-sponsored enterprises due to the potential reduction in the capacity of the U.S. government to support these securities, these investments were reported as eligible split-rated investments.

Capital Resources

At September 30, 2014, the bank's capital totaled \$1,517,069, and consisted of \$600,000 of Class B non-cumulative subordinated perpetual preferred stock, \$220,761 of capital stock and \$719,162 in retained earnings, offset by \$22,854 in accumulated other comprehensive loss. The balance in equity reflected an increase of \$123,822 from equity at December 31, 2013, due primarily to net income of \$146,381 and \$10,259 in other comprehensive gains, offset by preferred stock dividends of \$30,187 and \$2,849 in patronage declared and paid.

As of September 30, 2014, the bank exceeded the minimum permanent capital, core surplus, total surplus and net collateral ratio requirements under Farm Credit Administration regulations. At September 30, 2014, the bank's permanent capital ratio was 18.59 percent, core surplus ratio was 9.99 percent, total surplus ratio was 15.81 percent and the net collateral ratio was 108.84 percent. The decrease in accumulated other comprehensive loss of \$10,259 included a decrease in unrealized losses on investments of \$9,094 and a \$1,309 decrease in unrealized losses on cash flow derivative instruments, net of a \$144 amortization of other postretirement benefits. The decrease in unrealized losses on investment securities was due primarily to changes in the interest rate environment.

Key financial condition comparisons:

	<u>September 30, 2014</u>	<u>December 31, 2013</u>
Permanent capital ratio	18.59%	21.64%
Net collateral ratio	108.84%	108.67%
Allowance and reserve for credit losses to total loans	0.09%	0.16%

OTHER

CONDITIONS IN THE TEXAS FARM CREDIT DISTRICT

As of the third quarter of 2014, portions of Alabama, New Mexico and Texas were in a state of drought. Nevertheless, the Texas District, in general, benefited from a year-over-year improvement in soil moisture levels. This has generally resulted in healthier pasture and range conditions as well as sufficient moisture for the production of field crops. While the threat of drought remains, adequate topsoil and subsoil moisture levels across the district should continue to support pasture and range conditions as well as promote optimism and planting activity during the next planting season. However, as farmers look forward to the next planting season, the potential for a lower price environment could dictate total acres planted and changes in price relationships may cause crop allocations to change.

For 2014, most crops across the Texas District states are being harvested. According to the September 30, 2014, USDA crop progress report, cotton conditions across the district are primarily in fair to good condition, with a strong improvement in production forecasted for the state of Texas, which is primarily attributable to improved growing conditions in the Southern High Plains. Nevertheless, improved production levels are expected to be met by lower market prices for cotton, driven by increased global stocks. The corn crop in the states of Texas and New Mexico primarily ranged from fair to excellent condition, while the crop in the eastern states neared completion of harvest. The soybean crop's conditions across the eastern states primarily ranged from fair to excellent; however, double-crop soybeans in Alabama have suffered from the drier conditions that have recently developed in many parts of the state. With the USDA forecasting record crops for corn and soybeans, stocks of both commodities are expected to increase, resulting in weaker prices than in past years. Farmers in the district continue to use risk management tools, such as programs under the U.S. Farm Bill, multi-peril crop insurance and forward, futures and options contracts.

Across most of the district, reduced feed prices, coupled with the continuation of historically high protein prices, have had a positive impact on the livestock, poultry and dairy industries. The cattle industry continues to experience contracted herd levels, due to the previous prolonged drought conditions in the U.S. Plains States; however, cattle ranchers in many areas in the district have begun the process of expanding their herds through increased cow and heifer retention. Cattle feedlots continue to manage through the effects of smaller herds; however, elevated beef prices and a strong corn crop have aided profitability. Dairy producers are currently benefiting from very strong milk prices and are feeling some relief due to reduced feed costs. Given the limited supplies of meat and poultry, caused by the recent reduction to the cattle herd, the effects of the porcine virus on pork production and the continued decline in feed costs, poultry integrators have been able to maintain margins. As livestock producers manage profitability, risk management of operations will continue to provide protection from commodity price volatility and the threat of rising production costs.

Labor markets are generally improving, and the housing and construction sector continues to recover. Global supply and demand dynamics continue to play a supportive role in the agricultural concentrations in the district loan portfolio, which is expected to contribute to the preservation of credit quality. As always, weather conditions as well as other macro-economic forces, such as unemployment and foreign demand, might impact portfolio profitability going forward. However, the district continues to be supported by strong credit quality and well-balanced portfolio diversification.

ASSOCIATION MERGERS

In 2014, there were two mergers affecting four district associations. The mergers of Lone Star, ACA and Texas Land Bank, ACA, forming Lone Star, ACA, and of Texas AgFinance and AgriLand, Farm Credit Services, forming Texas Farm Credit Services, became effective January 1, 2014. The mergers were accounted for under the acquisition method of accounting under generally accepted accounting principles. As of January 1, 2014, the number of affiliated associations in the district decreased from 17 to 15, consisting of 14 ACAs and one FLCA.

AgTexas Farm Credit Services and Great Plains Ag Credit, ACA have requested and received approval of a merger from the FCA. On October 17, 2014, the stockholders of both associations voted to approve the merger at their respective stockholders' meetings, which commenced a 35-day reconsideration period. If approved, the merger would be effective January 1, 2015.

RATING AGENCY ACTIONS

Moody's Investors Service Ratings Actions

On October 30, 2014, Moody's Investors Service (Moody's) affirmed the bank's issuer rating at "Aa3," its subordinated debt rating at "A2," and its noncumulative preferred stock rating at "Baa1 (hyb)," with a stable outlook. The Aa3 issuer rating reflects the bank's "a1" baseline credit assessment (BCA), very high cooperative support from the other Federal Farm Credit Banks and moderate support from the U.S. Government, which has an "Aaa," stable outlook. The bank's stable outlook reflects the strong market conditions for agricultural lending, as well as Moody's expectation that the bank's consistent performance and strong capital level will continue.

Fitch Ratings Actions

On September 23, 2014, Fitch Ratings affirmed the bank's long-term and short-term issuer default ratings (IDRs) at "AA-" and "F1+," respectively, with a stable outlook. Fitch also affirmed the bank's subordinated debt rating at "A+," its noncumulative perpetual preferred stock rating at "BBB" and its support floor at "AA-." Fitch also affirmed the Farm Credit System's long-term and short-term issuer default ratings (IDRs) at "AAA" and "F1+," respectively, with a stable outlook, and its support floor at "AAA." As a government-sponsored entity, the System benefits from implicit government support, and thus, the ratings and rating outlook are directly linked to the U.S. sovereign rating. The affirmation of the System banks' IDRs reflect their prudent, conservative credit culture, their unique funding advantage and their structural second-loss position on the majority of their loan portfolio.

REGULATORY MATTERS

As of September 30, 2014, FCA had enforcement actions in place against one association in the district, which has not had, and is not expected to have, a significant impact on the bank.

On March 13, 2014, the FCA Board approved an interim final rule to remove all requirements related to nonbinding advisory votes regarding chief executive officer (CEO) and senior officer compensation at Farm Credit System institutions. The comment period for the interim rule ended on April 30, 2014, and the final rule became effective on June 18, 2014. Other provisions of recent regulations regarding enhanced transparency of compensation for CEOs and senior officers and enhanced responsibilities of the compensation committees of boards of directors continue to be in effect.

On July 25, 2014, the Farm Credit Administration Board published a proposed rule to modify regulations related to eligible investments for the banks and associations of the Farm Credit System (FCS or System). The proposed rule would strengthen the safety and soundness of the investment activities of System banks by more accurately reflecting the risk in particular investments. It would also comply with a provision of the Dodd-Frank Wall Street Reform and Consumer Protection Act by replacing credit rating requirements with other standards of creditworthiness. In addition, the proposed rule would grant associations greater flexibility regarding the risk management purposes for which they may hold investments while placing new limits on the amounts and types of investments they may hold. It would strengthen risk management practices at associations and require greater bank oversight of association investments. The 90-day comment period expired October 23, 2014.

On September 4, 2014, the Farm Credit Administration published a proposed rule to modify the regulatory capital requirements for System banks and associations. The objectives of the proposed rule are as follows:

- To modernize capital requirements while ensuring that institutions continue to hold sufficient regulatory capital to fulfill their mission as a government-sponsored enterprise.
- To ensure that the System's capital requirements are comparable to the Basel III framework and the standardized approach that the federal banking regulatory agencies have adopted, but also to ensure that the rules recognize the cooperative structure and the organization of the System.
- To make System regulatory capital requirements more transparent.
- To meet the requirements of section 939A of the Dodd-Frank Wall Street Reform and Consumer Protection Act.

The 120-day public comment period will expire January 2, 2015.

On September 24, 2014, the Farm Credit Administration Board published a joint proposed rule with the Office of the Controller of the Currency, the Board of Governors of the Federal Reserve System, Federal Deposit Insurance Corporation and the Federal Housing Financing Agency to establish minimum margin and capital requirements for registered swap dealers, major swap participants, security-based swap dealers and major security-based swap participants that one of those agencies regulates that implements sections 731 and 764 of the Dodd-Frank Wall Street Reform and Consumer Protection Act requiring the adoptions of rules to establish capital requirements and initial and variation margin requirements for such entities and their counterparties on all non-cleared swaps and non-cleared security-based swaps. The comment period for this rule expires November 24, 2014.

OTHER MATTERS

The bank and a district association, Capital Farm Credit, ACA, have joined seven other Farm Credit organizations and Advantage Capital Partners to create the Advantage Capital Agribusiness Fund. The fund was formed as a Rural Business Investment Company and is conditionally licensed by the U.S. Department of Agriculture through its Rural Business Investment Program to promote economic development in Rural America. The investment objectives of the fund are to develop a balanced and diversified portfolio of junior capital investments and focus on later-stage growth-oriented small businesses involved in agriculture, processing and marketing of agricultural products, farm supply, input suppliers and rural communications. The fund will consider investment opportunities in any rural area in the U.S. Total eventual fund size will be \$150 million, and initial funding began in November 2014.

The undersigned certify that we have reviewed the September 30, 2014, quarterly report of the Farm Credit Bank of Texas, that the report has been prepared in accordance with all applicable statutory or regulatory requirements and that the information included herein is true, accurate and complete to the best of our knowledge and belief.

Controls and Procedures

The Farm Credit Bank of Texas (bank) maintains a system of disclosure controls and procedures. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information disclosed by us in our quarterly and annual reports is accumulated and communicated to our management, including our chief executive officer and our chief financial officer, as appropriate, to allow timely decisions to be made regarding disclosure. With management's input, the chief executive officer and the chief financial officer have evaluated our disclosure controls and procedures as of the end of and for the period covered by this quarterly report, and have concluded that our disclosure controls and procedures are effective as of that date.

The bank also maintains a system of internal controls. The "internal controls" as defined by the American Institute of Certified Public Accountants' Codification of Statement on Auditing Standards, AU Section 319, means a process — effected by the board of directors, management and other personnel — designed to provide reasonable assurance regarding the achievement of objectives in the reliability of our financial reporting, the effectiveness and efficiency of operations, and of compliance with applicable laws and regulations. We continually assess the adequacy of our internal control over financial reporting and enhance our controls in response to internal control assessments, and internal and external audit and regulatory recommendations. There have been no significant changes in our internal controls or in other factors that could significantly affect such controls subsequent to the date we carried out our evaluations.

Larry R. Doyle
Chief Executive Officer

Notes to Financial Statements

Unaudited (dollar amounts in thousands unless otherwise noted)

NOTE 1 — ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements include the accounts of the Farm Credit Bank of Texas (bank). The significant accounting policies followed and the financial condition and results of operations of the bank as of and for the year ended December 31, 2013, are contained in the 2013 Annual Report to shareholders (Annual Report). These unaudited third quarter 2014 financial statements should be read in conjunction with the Annual Report.

In the opinion of management, the accompanying unaudited financial statements contain all adjustments necessary for a fair presentation of the interim financial condition and results of operations of the bank, and conform to generally accepted accounting principles. The preparation of these financial statements requires the use of management's estimates. The results of operations for any interim period are not necessarily indicative of the results to be expected for the entire year.

The bank and its affiliated associations (district), are part of the federally chartered Farm Credit System (System). The bank provides funding to district associations, which, in turn, provide credit to their borrower-shareholders. At September 30, 2014, the bank provided financing to 15 district associations and certain other financing institutions.

In February 2013, the FASB issued guidance, "Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income." The guidance requires entities to present either parenthetically on the face of the financial statements or in the notes to the financial statements, significant amounts reclassified from each component of accumulated other comprehensive income and the income statement line items affected by the reclassification. The guidance became effective for public entities for annual periods beginning after December 15, 2012, and for nonpublic entities for annual periods beginning after December 15, 2013. The adoption of this guidance did not impact the financial condition or results of operations, but resulted in additional disclosures.

In May 2014, the FASB issued guidance entitled, "Revenue from Contracts with Customers." The guidance governs revenue recognition from contracts with customers and requires an entity to recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Financial instruments and other contractual rights within the scope of other guidance issued by the FASB are excluded from the scope of this new revenue recognition guidance. In this regard, a majority of our contracts would be excluded from the scope of this new guidance. The guidance becomes effective for the first interim reporting period within the annual reporting periods after December 15, 2016. The bank is in the process of reviewing contracts to determine the effect, if any, on their financial condition or results of operations.

NOTE 2 — INVESTMENTS

Available for Sale

The bank's available-for-sale investments include a liquidity portfolio and a portfolio of other investments. The liquidity portfolio consists primarily of mortgage-backed securities (MBS), corporate debt, agency-guaranteed debt and asset-backed securities (ABS). The majority of the liquidity portfolio's MBS were federal agency-guaranteed collateralized MBS, including Government National Mortgage Association (GNMA), Federal National Mortgage Association (FNMA) and Federal Home Loan

Mortgage Corporation (FHLMC) securities. The bank's other investments portfolio consists of Federal Agricultural Mortgage Corporation (Farmer Mac) guaranteed agricultural mortgage-backed securities (AMBS) purchased from district associations. A summary of the amortized cost and fair value of investment securities available for sale, at September 30, 2014, and December 31, 2013, is included in the following tables.

Investments in the available-for-sale liquidity portfolio at September 30, 2014:

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Weighted Average Yield
Agency-guaranteed debt	\$ 137,333	\$ -	\$ (3,968)	\$ 133,365	1.61 %

Total fair value	\$ 93,636	\$ 213,565	\$ 219,710	\$ 3,281,177	\$ 3,808,088
Total amortized cost	\$ 93,567	\$ 212,864	\$ 218,973	\$ 3,301,480	\$ 3,826,884
Weighted average yield	0.54%	0.99%	1.95%	1.36%	1.35%

Investments in the available-for-sale other investments portfolio:

	Due after one year through five years
Fair value of agricultural mortgage-backed securities	\$ 88,647
Total amortized cost	\$ 91,059
Weighted average yield	4.11%

Other-Than-Temporarily Impaired Investments Evaluation

The following table shows available-for-sale liquidity portfolio investments by gross unrealized losses and fair value, aggregated by investment category and length of time, for securities that have been in a continuous unrealized loss position at September 30, 2014. The continuous loss position is based on the date the impairment was first identified:

	Less Than 12 Months		Greater Than 12 Months		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Agency-guaranteed debt	\$ 33,304	\$ (93)	\$ 92,632	\$ (3,875)	\$ 125,936	\$ (3,968)
Corporate debt	39,729	(225)	14,877	(106)	54,606	(331)
Federal agency collateralized mortgage-backed securities						
GNMA	546,027	(3,473)	522,202	(13,104)	1,068,229	(16,577)
FNMA and FHLMC	505,127	(2,384)	439,607	(8,819)	944,734	(11,203)
Other collateralized mortgage-backed securities	4,180	(26)	2,434	(156)	6,614	(182)
Asset-backed securities	-	-	563	(2)	563	(2)
Total	\$ 1,128,367	\$ (6,201)	\$ 1,072,315	\$ (26,062)	\$ 2,200,682	\$ (32,263)

The bank evaluates investment securities for other-than-temporary impairment on a quarterly basis. Impairment is considered to be other than temporary if an entity (i) intends to sell the security, (ii) is more likely than not to be required to sell the security before recovering its cost or (iii) does not expect to recover the security's entire amortized cost basis (even if the entity does not intend to sell).

In the nine months ended September 30, 2014, the bank did not recognize any other-than-temporary impairment credit losses. The non-credit-related net decrease in fair value on the bank's other-than-temporarily impaired investments for the nine months ended September 30, 2014, totaling \$59, is included as a credit to other comprehensive loss. At September 30, 2014, the bank had one asset-backed security that was considered to be other-than-temporarily impaired.

As the bank has no intention to sell the security deemed other-than-temporarily impaired and will not more likely than not be required to sell the security before recovery, only the credit loss portion of impairment would be recognized through earnings. To measure the amount related to credit loss in the determination of other-than-temporary impairment, the bank utilizes a third-party vendor's services for cash flow modeling and projection of credit losses for specific non-agency residential mortgage-backed securities and subprime asset-backed securities. Significant inputs utilized in the methodology of the modeling include assumptions surrounding market data (interest rates and home prices) and the applicable securities' loan-level data. Loan-level data evaluated includes loan status, coupon and resets, FICO scores, loan-to-value, geography, property type, etc. Loan-level data is then combined with assumptions surrounding future behavior of home prices, prepayment rates, default rates and loss severity to arrive at cash flow projections for the underlying collateral. Default rate assumptions are generally estimated using historical loss and performance information to estimate future defaults. The present value of these cash flow projections is then evaluated against the specific security's structure and credit enhancement to determine if the bond will absorb losses.

The following are the assumptions used at:

Assumptions Used	September 30, 2014	
	Mortgage- Backed Securities	Asset-Backed Securities
Default by range	0.7% - 4.1%	4.0% - 6.9%
Prepayments rate by range	4.0% - 17.5%	2.5% - 4.9%
Loss severity by range	9.2% - 34.5%	55.5% - 57.8%

Assumptions Used	December 31, 2013	
	Mortgage- Backed Securities	Asset-Backed Securities
Default by range	0.5% - 6.1%	8.1% - 12.4%
Prepayments rate by range	4.0% - 19.4%	2.8% - 6.8%
Loss severity by range	17.0% - 31.0%	55.9% - 59.7%

The following is a rollforward of the amount related to credit losses recognized for the three and nine months ended September 30:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2014	2013	2014	2013
Credit loss component, beginning of period	\$ 454	\$ 1,600	\$ 454	\$ 5,084
Additions:				
Subsequent credit impairment	-	-	-	143
Reductions:				
For securities sold	-	-	-	(3,627)
Credit loss component end of period	\$ 454	\$ 1,600	\$ 454	\$ 1,600

NOTE 3 — LOANS AND RESERVES FOR CREDIT LOSSES

Loans, including direct notes to district associations and other financing institutions (OFIs), participations purchased and other bank-owned loans, comprised the following categories at:

	September 30, 2014	December 31, 2013
Direct notes receivable from district associations and OFIs	\$ 8,206,713	\$ 7,360,025
Participations purchased	4,495,944	4,416,737
Other loans	1,935	1,979
Balance at end of period	\$ 12,704,592	\$ 11,778,741

A summary of the bank's loans by type follows:

	September 30, 2014	December 31, 2013
Direct notes receivable from district associations	\$ 8,176,262	\$ 7,325,645
Real estate mortgage	352,279	387,766
Production and intermediate term	458,963	458,351
Loans to cooperatives	152,194	139,994
Processing and marketing	1,771,318	1,725,617
Farm-related business	218,588	131,366
Communication	252,312	230,499
Energy (rural utilities)	1,091,070	1,177,463
Water and waste disposal	137,365	114,704
Rural residential real estate	21	21
Agricultural export finance	30,933	19,651
Loans to other financing institutions	30,451	34,380
Mission-related	32,836	33,284
Total	\$ 12,704,592	\$ 11,778,741

The bank's capital markets loan portfolio predominantly includes participations, syndications and purchased whole loans, along with other financing structures within our lending authorities. The bank also refers to the capital markets portfolio as participations purchased. In addition to purchasing loans from our district associations, which may exceed their hold limits, the bank actively pursues the purchase of participations and syndications originated outside of the district's territory by other System institutions, commercial banks and other lenders. These loans may be held as earning assets of the bank or sub-participated to the associations or to other System entities.

The bank purchases or sells participation interests with other parties in order to diversify risk, manage loan volume and comply with Farm Credit Administration regulations. The following table presents information regarding the balances of participations purchased and sold, excluding syndications, at September 30, 2014.

	Other Farm Credit Institutions		Non-Farm Credit Institutions		Total	
	Participations Purchased	Participations Sold	Participations Purchased	Participations Sold	Participations Purchased	Participations Sold
	Real estate mortgage	\$ 346,188	\$ 281,793	\$ 1,671	\$ -	\$ 347,859

Loans to other financing institutions	-	15,943	-	-	-	15,943
Direct note receivable from district associations	-	3,650,000	-	-	-	3,650,000
Total	\$ 4,395,145	\$ 5,343,361	\$ 40,512	\$ 24,618	\$ 4,435,657	\$ 5,367,979

In April 2014, the bank purchased \$4,228 in loan participations and \$9,052 in Federal Agricultural Mortgage Corporation (Farmer Mac) guaranteed agricultural mortgage-backed securities (AMBS) from one association in CPP transactions. The purchases represent 80.0 percent of the outstanding balances of the loans placed by the association in the CPP. As a condition of the transactions, the bank redeemed stock in the amount of 2.0 percent of the par value of the loans and AMBS purchased, and the association bought bank stock equal to 8.0 percent of the purchased loans' par value and 1.6 percent of the AMBS' value. CPP loans held at September 30, 2014, totaled \$36,822. The balance of the AMBS CPP was \$88,647 at September 30, 2014.

The bank is authorized under the Farm Credit Act to accept "advance conditional payments" (ACPs) from borrowers. To the extent the borrower's access to such ACPs is restricted and the legal right of setoff exists, the ACPs are netted against the borrower's related loan balance. Unrestricted advance conditional payments are included in other liabilities. ACPs are not insured, and interest is generally paid by the bank on such balances. There were no significant balances of ACPs at September 30, 2014, or December 31, 2013.

During 2012, the bank elected the fair value option for certain callable loans purchased on the secondary market at a significant premium. The fair value option provides an irrevocable option to elect fair value as an alternative measurement for selected financial assets. The fair value of loans held under the fair value option totaled \$56,787 at September 30, 2014. Fair value is used for both the initial and subsequent measurement of the designated instrument, with the changes in fair value recognized in net income. On these instruments, the related contractual interest income and premium amortization are recorded as Interest Income in the Statements of Comprehensive Income. The remaining changes in fair value on these instruments are recorded as net gains (losses) in Noninterest Income on the Statements of Comprehensive Income. The fair value of these instruments is included in Level 2 in the fair value hierarchy for assets recorded at fair value on a recurring basis.

The following is a summary of the transactions on loans for which the fair value option has been elected for the nine months ended September 30, 2014:

Balance at January 1, 2014	\$ 58,461
Net losses on financial instruments under fair value option	(98)
Change in premium	<u>(1,576)</u>
Balance at September 30, 2014	<u>\$ 56,787</u>

Nonperforming assets (including related accrued interest) and related credit quality statistics are as follows:

	September 30, 2014	December 31, 2013
Nonaccrual loans:		
Real estate mortgage	\$ 837	\$ 5,722
Production and intermediate term	4,576	19,091
Agribusiness	-	2,148
Energy and water/waste disposal	2,123	1,171
Total nonaccrual loans	7,536	28,132
Accruing restructured loans:		
Real estate mortgage	886	897
Production and intermediate term	8,605	8,752
Mission-related	2,850	2,833
Total accruing restructured loans	12,341	12,482
Total nonperforming loans	19,877	40,614
Other property owned, net	10,839	13,812
Total nonperforming assets	\$ 30,716	\$ 54,426

One credit quality indicator utilized by the bank and associations is the Farm Credit Administration Uniform Loan Classification System that categorizes loans into five categories. The categories are defined as follows:

- Acceptable – assets are expected to be fully collectible and represent the highest quality;
- Other assets especially mentioned (OAEM) – assets are currently collectible but exhibit some potential weakness;
- Substandard – assets exhibit some serious weakness in repayment capacity, equity and/or collateral pledged on the loan;
- Doubtful – assets exhibit similar weaknesses to substandard assets; however, doubtful assets have additional weaknesses in existing factors, conditions and values that make collection in full highly questionable; and
- Loss – assets are considered uncollectible.

The following table shows loans and related accrued interest as a percentage of total loans and related accrued interest receivable by loan type as of:

	September 30, 2014	December 31, 2013
Real estate mortgage:		
Acceptable	96.4 %	95.3 %
OAEM	2.3	2.2
Substandard/Doubtful	1.3	2.5

The average recorded investment in impaired loans for the three months ended September 30, 2014, was \$23.3 million. The bank recognized interest income of \$1.7 million on impaired loans during the three months ended September 30, 2014.

The average recorded investment in impaired loans for the nine months ended September 30, 2014, was \$31.6 million. The bank recognized interest income of \$2.4 million on impaired loans during the nine months ended September 30, 2014.

At September 30, 2014, impaired loans of \$2.4 million had a related specific allowance of \$2.2 million, while the remaining \$17.5 million of impaired loans had no related specific allowance as a result of adequate collateralization.

A summary of changes in the allowance for loan losses and period-end recorded investment in loans is as follows:

* Reserve for losses on standby letters of credit and unfunded commitments recorded in other liabilities

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. Troubled debt restructurings are undertaken in order to improve the likelihood of recovery on the loan and may include, but are not limited to, forgiveness of principal or interest, interest rate reductions that are lower than the current market rate for new debt with similar risk, or significant term or payment extensions.

As of September 30, 2014, the total recorded investment of troubled debt restructured loans was \$13,203, including \$862 classified as nonaccrual and \$12,341 classified as accrual, with specific allowance for loan losses of \$72. There were no additional commitments to lend to borrowers whose loan terms have been modified in TDRs at September 30, 2014, compared to \$32 at December 31, 2013.

The following table summarizes TDR loan balances by loan type:

	Loans Modified as TDRs		TDRs in Nonaccrual Status	
	September 30, 2014	December 31, 2013	September 30, 2014	December 31, 2013
Real estate mortgage	\$ 1,748	\$ 3,830	\$ 862	\$ 2,933
Production and intermediate term	8,605	8,752	-	-
Agribusiness	-	2,148	-	2,148
Mission-related	2,850	2,833	-	-
Total	<u>\$ 13,203</u>	<u>\$ 17,563</u>	<u>\$ 862</u>	<u>\$ 5,081</u>

During the nine months ended September 30, 2014, there were no restructured loans designated as troubled debt restructurings. During the period there were no payment defaults on loans that were restructured during the previous 12 months. A payment default is defined as a payment that is 30 days past due after the date the loan was restructured.

NOTE 4 — COMMITMENTS AND CONTINGENT LIABILITIES

The bank is primarily liable for its portion of Systemwide debt obligations. Additionally, the bank is jointly and severally liable for the consolidated Systemwide bonds and notes of the other System banks. Total consolidated bank and Systemwide obligations of the System at September 30, 2014, were approximately \$214.4 billion.

In the normal course of business, the bank has various outstanding commitments and contingent liabilities, including the possibility of actions against the bank in which claims for monetary damages may be asserted. Management and legal counsel are not aware of any other pending lawsuits or actions. Upon the basis of current information, management and legal counsel are of the opinion that the ultimate liability, if any, resulting from lawsuits or other pending actions will not be material in relation to the financial position, results of operations or cash flows of the bank.

NOTE 5 — FAIR VALUE MEASUREMENTS

Accounting guidance defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability. See Note 2, "Summary of Significant Accounting Policies," of the 2013 Annual Report for a more complete description.

Assets and liabilities recorded at fair value on a recurring basis at September 30, 2014, for each of the fair value hierarchy levels are summarized below:

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Federal funds	\$ 20,769	\$ -	\$ 20,769	\$ -
Investments available for sale:				
Corporate debt	224,073	-	224,073	-
Agency-guaranteed debt	133,365	-	133,365	-
Mortgage-backed securities	3,393,920	-	3,369,100	24,820
Asset-backed securities	56,730	-	55,857	873
Mission-related and other available-for-sale investments	88,647	-	-	88,647
Loans valued under the fair value option	56,787	-	56,787	-
Derivative assets	929	-	929	-
Assets held in nonqualified benefit trusts	293	293	-	-
Total assets	\$ 3,975,513	\$ 293	\$ 3,860,880	\$ 114,340
Liabilities:				
Standby letters of credit	\$ 748	\$ -	\$ -	\$ 748
Total liabilities	\$ 748	\$ -	\$ -	\$ 748

Loans With Fair Value Option

During 2012, the bank elected the fair value option for certain callable loans purchased on the secondary market at a significant premium. The fair value option provides an irrevocable option to elect fair value as an alternative measurement for selected financial assets. It requires entities to display the fair value of those assets for which the entity has chosen to use fair value on the face of the statement of condition. Fair value is used for both the initial and subsequent measurement of the designated instrument, with the changes in fair value recognized in net income. On these instruments, the related contractual interest income and premium amortization are recorded as Interest Income in the Statements of Comprehensive Income. The remaining changes in fair value on these instruments are recorded as net gains (losses) in Noninterest Income on the Statements of Comprehensive Income. The fair value of these instruments is included in Level 2 in the fair value hierarchy for assets recorded at fair value on a recurring basis.

The following table represents a reconciliation of all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3) for the period from June 30, 2014, to September 30, 2014:

	Assets					Liabilities	
	Corporate Debt	Agency-Guaranteed Debt	Mortgage-Backed Securities	Agricultural Mortgage-Backed Securities	Asset-Backed Securities	Standby Letters of Credit	Net

Transfers into Level 3	-	-	-	-	-	832	(832)
Transfers out of Level 3	(15,000)	(26,783)	(128,725)	-	-	-	(170,508)
Balance at September 30, 2014	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 24,820</u>	<u>\$ 88,647</u>	<u>\$ 873</u>	<u>\$ 748</u>	<u>\$ 113,592</u>
The amount of losses for the period included in earnings attributable to the change in unrealized gains or losses relating to assets or liabilities still held at September 30, 2014	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ -</u>

There were no transfers of assets or liabilities into or out of Level 1 from other levels during the nine months ended September 30, 2014. Agricultural mortgage-backed securities are included in Level 3 due to limited activity or less transparency around inputs to their valuation. At September 30, 2014, Level 3 investments included one agency MBS due to the fact that their valuations were based on Level 3 criteria (broker quotes) and certain non-agency MBS and non-agency ABS backed by home equity. In the first nine months of 2014, three agency MBS, three agency-guaranteed debt instruments and one corporate debt instrument which had previously been included in Level 3 were valued using independent third-party valuation services using Level 2 criteria and were, accordingly, transferred from Level 3 to Level 2. The liability for standby letters of credit was transferred into Level 3 during the first nine months of 2014 due to a determination that their valuation, based on fees currently charged for similar agreements, may not closely correlate to a fair value for instruments that are not regularly traded in the secondary market. For the nine months ended September 30, 2014, all transfers into and out of Level 3 were related to sources of pricing information. Valuations subsequent to purchase which are obtained from independent third party services utilizing Level 2 criteria were the basis for transfers out of Level 3.

Assets and liabilities measured at fair value on a nonrecurring basis at September 30, 2014, for each of the fair value hierarchy levels are summarized below:

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)	Total Gains (Losses)
Assets:					
Loans	\$ 5,366	\$ -	\$ -	\$ 5,366	\$ (2,362)
Other property owned	12,043	-	-	12,043	316
Total assets	<u>\$ 17,409</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 17,409</u>	<u>\$ (2,046)</u>

Assets and liabilities measured at fair value on a recurring basis at December 31, 2013, for each of the fair value hierarchy levels are summarized below:

	Total	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Federal funds	\$ 21,809	\$ -	\$ 21,809	\$ -
Investments available for sale:

Valuation Techniques

As more fully discussed in Note 2, “Summary of Significant Accounting Policies,” of the Annual Report, accounting guidance establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The following represent a brief summary of the valuation techniques used for the bank’s assets and liabilities:

Investments Available for Sale

Where quoted prices are available in an active market, available-for-sale securities would be classified as Level 1. If quoted prices are not available in an active market, the fair value of securities is estimated using pricing models, quoted prices for similar securities received from pricing services or discounted cash flows. Generally, these securities would be classified as Level 2. To estimate the fair value of investments, the bank obtains prices from third-party pricing services. This would include certain mortgage-backed and asset-backed securities. Where there is limited activity or less transparency around inputs to the valuation, the securities are classified as Level 3. Investments classified as Level 3 primarily consist of the certain non-agency mortgage-backed securities and asset-backed securities valued using independent third-party valuation services. Also included in the bank’s Level 3 assets are the Farmer Mac AMBS.

Derivative Assets and Liabilities

The bank’s derivative positions are valued using internally developed models that use as their basis readily observable market parameters and are classified within Level 2 of the valuation hierarchy. Such derivatives may include fair value interest rate swaps, interest rate caps and cash flow interest rate swaps. The models used to determine the fair value of derivative assets and liabilities use an income approach

based on observable inputs, primarily the LIBOR swap curve and volatility assumptions about future interest rate movements.

Assets Held in Nonqualified Benefit Trusts

Assets held in trust funds related to deferred compensation and supplemental retirement plans are classified within Level 1. The trust funds include investments that are actively traded and have quoted net asset values that are observable in the marketplace.

Standby Letters of Credit

The fair value of letters of credit approximates the fees currently charged for similar agreements or the estimated cost to terminate or otherwise settle similar obligations.

Loans

Fair value is estimated by discounting the expected future cash flows using the bank's current interest rates at which similar loans would be made to borrowers with similar credit risk. As the discount rates are based on the bank's loan rates as well as on management estimates, management has no basis to determine whether the fair values presented would be indicative of the value negotiated in an actual sale.

For purposes of determining fair value of accruing loans, the loan portfolio is segregated into pools of loans with homogeneous characteristics. Expected future cash flows and discount rates reflecting appropriate credit risk are determined separately for each individual pool.

For loans which are valued at fair value under the fair value pricing option, if quoted prices are not available in an active market, the fair value is estimated using pricing models, quoted prices for similar instruments received from pricing services or discounted cash flows. Generally, these loans would be classified as Level 2. To estimate the fair value of these instruments, the bank obtains prices from third-party pricing services.

For certain loans evaluated for impairment, the fair value is based upon the underlying collateral since the loans were collateral-dependent loans for which real estate is the collateral. These loans are generally classified as Level 3. The fair value measurement process uses independent appraisals and other market-based information, but in many cases it also requires significant input based on management's knowledge of and judgment about current market conditions, specific issues relating to the collateral and other matters. As a result, these fair value measurements fall within Level 3 of the hierarchy. When the value of the real estate, less estimated costs to sell, is less than the principal balance of the loan, a specific reserve is established.

Bonds and Notes

Systemwide debt securities are not all traded in the secondary market and those that are traded may not have readily available quoted market prices. Therefore, the fair value of the instruments is estimated by calculating the discounted value of the expected future cash flows. The discount rates used are based on the sum of quoted market yields for the Treasury yield curve and an estimated yield-spread relationship between System debt instruments and Treasury securities. We estimate an appropriate yield-spread taking into consideration selling group member (banks and securities dealers) yield indications, observed new government-sponsored enterprise debt security pricing, and pricing levels in the related U.S. dollar interest rate swap market.

Subordinated Debt

The fair value of these obligations is determined by discounting expected future cash flows based on the Treasury yield curve.

Other Property Owned

Other property owned (OPO) is generally classified as Level 3 of the fair value hierarchy. The process for measuring the fair value of other property owned involves the use of independent appraisals or other market-based information. Costs to sell represent transaction costs and are not included as a component of the asset's fair value. As a result, these fair value measurements fall within Level 3 of the hierarchy.

Sensitivity to Changes in Significant Unobservable Inputs

For recurring fair value measurements categorized within Level 3 of the fair value hierarchy, the significant unobservable inputs used in the fair value measurement of the mortgage-backed securities are prepayment rates, probability of default and loss severity in the event of default. Significant increases (decreases) in any of those inputs in isolation would result in a significantly lower (higher) fair value measurement.

Generally, a change in the assumption used for the probability of default is accompanied by a directionally similar change in the assumption used for the loss severity and a directionally opposite change in the assumption used for prepayment rates.

Quoted market prices may not be available for the instruments presented below. Accordingly, fair values are based on internal models that consider judgments regarding anticipated cash flows, future expected loss experience, current economic conditions, risk characteristics of various financial instruments and other factors. These estimates involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Quantitative Information About Recurring and Nonrecurring Level 3 Fair Value Measurements

	Valuation Technique(s)	Unobservable Input
Mortgage-backed securities	Discounted cash flow	Prepayment rate Probability of default Loss severity
Asset-backed securities	Discounted cash flow	Prepayment rate Probability of default Loss severity
Mission-related investments	Discounted cash flow	Prepayment rates

Information About Recurring and Nonrecurring Level 2 Fair Value Measurements

	Valuation Technique(s)	Input
Federal funds sold	Carrying value	Par/principal
Investment securities available for sale	Quoted prices	Price for similar asset
	Discounted cash flow	Constant prepayment rate Appropriate interest rate yield curve
Loans held under the fair value option	Quoted prices	Price for similar instruments
	Discounted cash flow	Constant prepayment rate Appropriate interest rate yield curve
Interest rate swaps	Discounted cash flow	Appropriate interest rate yield curve
Interest rate caps	Discounted cash flow	Appropriate interest rate yield curve Annualized volatility

Information About Other Financial Instrument Fair Value Measurements

	Valuation Technique(s)	Input
Cash	Carrying value	Actual balances
Loans	Discounted cash flow	Prepayment forecasts
		Appropriate interest rate yield curve
		Probability of default
		Loss severity
Systemwide debt securities and subordinated debt	Discounted cash flow	Benchmark yield curve Derived yield spread Own credit risk

NOTE 6 — DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES

The bank maintains an overall interest rate risk management strategy that incorporates the use of derivative products to minimize significant unplanned fluctuations in earnings that are caused by interest rate volatility. The bank's goal is to manage interest rate sensitivity by modifying the repricing or maturity characteristics of certain balance sheet assets and liabilities so that movements in interest rates do not adversely affect the net interest margin. As a result of interest rate fluctuations, hedged fixed-rate assets and liabilities will appreciate or depreciate in market value. The effect of this unrealized appreciation or depreciation is expected to be substantially offset by the bank's gains or losses on the derivative instruments that are linked to these hedged assets and liabilities. Another result of interest rate fluctuations is that the interest income and interest expense of hedged floating-rate assets and liabilities will increase or decrease. The effect of this variability in earnings is expected to be substantially offset by the bank's gains and losses on the derivative instruments that are linked to these hedged assets and liabilities. The bank considers the strategic use of derivatives to be a prudent method of managing interest rate sensitivity, as it prevents earnings from being exposed to undue risk posed by changes in interest rates.

Although the bank held no interest rate swaps at September 30, 2014, it may enter into these derivative transactions to lower funding costs, diversify sources of funding, alter interest rate exposures arising from

mismatches between assets and liabilities or better manage liquidity. Interest rate swaps allow the bank to raise long-term borrowings at fixed rates and swap them into floating rates to better match the repricing characteristics of earning assets. Under interest rate swap arrangements, the bank agrees with other parties to exchange, at specified intervals, payment streams calculated on a specified notional principal amount, with at least one stream based on a specified floating-rate index.

A substantial amount of the bank's assets are interest-earning assets (principally loans and investments) that tend to be medium-term floating-rate instruments. In order to match the asset structure, interest rate swaps in which the bank pays the floating rate and receives the fixed rate (receive-fixed swaps) may be used to reduce the impact of market fluctuations on the bank's net interest income. Because the size of swap positions needed to reduce the impact of market fluctuations varies over time, the bank may also enter into swaps in which it receives the floating rate and pays the fixed rate (pay-fixed swaps) when necessary to reduce its net position.

The bank may purchase interest rate options, such as caps, in order to reduce the impact of rising interest rates on its floating-rate debt. The notional amounts and primary types of derivative instruments used and the amount of activity during the period are summarized in the following table:

	Receive-Fixed Swaps	Pay-Fixed Swaps	Interest Rate Caps	Total
Balance at January 1, 2014	\$ -	\$ -	\$ 695	\$ 695
Additions	-	-	50	50
Maturities/Amortizations	-	-	(80)	(80)
Balance at September 30, 2014	\$ -	\$ -	\$ 665	\$ 665

By using derivative products, the bank exposes itself to credit and market risk. If a counterparty fails to fulfill its performance obligations under a derivative contract, the bank's credit risk will equal the fair-value gain in a derivative. Generally, when the fair value of a derivative contract is positive, this indicates that the counterparty owes the bank, thus creating a repayment (credit) risk for the bank. When the fair value of the derivative contract is negative, the bank owes the counterparty and, therefore, assumes no repayment risk.

To minimize the risk of credit losses, the bank deals with counterparties that have an investment grade or better credit rating from a major rating agency, and also monitors the credit standing and levels of exposure to individual counterparties. The bank does not anticipate nonperformance by any of these counterparties. The bank typically enters into master agreements that contain netting provisions. These provisions allow the bank to require the net settlement of covered contracts with the same counterparty in the event of default by the counterparty on one or more contracts. However, derivative contracts must be reflected in the financial statements on a gross basis regardless of the netting agreement. Another way the bank minimizes the risk of credit losses from derivatives is that substantially all derivative contracts are supported by bilateral collateral agreements with counterparties requiring the posting of collateral in the event certain dollar thresholds of exposure of one party to the other one are reached; which thresholds may vary depending on the counterparty's credit rating. At September 30, 2014, and December 31, 2013, the bank's exposure to counterparties was \$929 and \$831, respectively. At September 30, 2014, and December 31, 2013, the bank had posted no securities as collateral, nor had any counterparty been required to post collateral.

The bank's derivative activities are monitored by its Asset-Liability Management Committee (ALCO) as part of the ALCO's oversight of the bank's asset/liability and treasury functions. The bank's ALCO is responsible for approving hedging strategies that are developed within parameters established by the

bank's board of directors through the bank's analysis of data derived from financial simulation models and other internal and industry sources. The resulting hedging strategies are then incorporated into the bank's overall interest rate risk-management strategies. The bank held no derivatives that were not designated as hedges at September 30, 2014, or December 31, 2013.

Cash Flow Hedges

The bank's derivative instruments that are designated and qualify as a cash flow hedge all meet the standards for accounting treatment that presume full effectiveness. Thus, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive loss. The bank's cash flow hedges at September 30, 2014, and December 31, 2013, consisted of interest rate caps.

Derivatives designated as hedging instruments	Balance Sheet Location	Fair Value 9/30/2014	Fair Value 12/31/2013	Balance Sheet Location	Fair Value 9/30/2014	Fair Value 12/31/2013
Interest rate caps	Other assets	\$ 929	\$ 831	Other liabilities	\$ -	\$ -

Derivatives designated as hedging instruments	Amount of (Loss) Gain Recognized in OCL on Derivatives (Effective Portion) September 30, 2014	September 30, 2013	Location of Gain Reclassification from AOCI into Income	Amount of Gain Reclassified from AOCL into Income (Effective Portion) September 30, 2014	September 30, 2013
Interest rate caps	\$ (608)	\$ 145	Interest expense	\$ 1,917	\$ 1,067

NOTE 7 — EMPLOYEE BENEFIT PLANS

In addition to pension benefits, the bank provides certain health care benefits to qualifying retired employees (other postretirement benefits). These benefits are not characterized as multiemployer and, consequently, the liability for these benefits is included in other liabilities. Bank employees hired after January 1, 2004, will be eligible for retiree medical benefits for themselves and their spouses at their expense but will be responsible for 100 percent of the related premiums. The following table summarizes the components of net periodic benefit costs for the bank's other postretirement benefit costs for the nine months ended September 30:

	Other Postretirement Benefits	
	2014	2013
Service cost	\$ 159	\$ 206
Interest cost	317	317
Amortization of prior service costs	(144)	(143)
Amortization of net loss	-	13
Net periodic benefit cost	\$ 332	\$ 393

The structure of the district's defined benefit pension plan is characterized as multiemployer, since the assets, liabilities and cost of the plan are not segregated or separately accounted for by participating employers (bank and associations).

NOTE 8 — ACCUMULATED OTHER COMPREHENSIVE LOSS

Accumulated other comprehensive (loss) income (AOCL) includes the accumulated balance of certain gains, losses or costs for which values are included in assets or liabilities on the balance sheets, but which have not yet been recognized in earnings. For the bank, these elements include unrealized gains or losses on the bank's available-for-sale investment portfolio, amortization of retirement benefit elements and changes in the value of cash flow derivative instruments.

The following table summarizes the changes in the balance of the components of AOCL for the nine months ended September 30, 2014:

	<u>Total</u>	<u>Unrealized Loss on Securities</u>	<u>Retirement Benefit Plans</u>	<u>Cash Flow Derivative Instruments</u>
Balance, January 1, 2014	\$ (33,113)	\$ (30,303)	\$ 1,642	\$ (4,452)
Change in unrealized losses on available-for-sale securities				
Net decrease in unrealized losses on investment securities	9,035	9,035		
Decrease in noncredit portion of other-than-temporary impairment (OTTI) losses	59	59		
Net decrease in unrealized losses on securities	<u>9,094</u>	<u>9,094</u>		
Change in postretirement benefit plans				
Amounts amortized into net periodic expense:				
Amortization of prior service credits	<u>(144)</u>		<u>(144)</u>	
Net change in postretirement benefit plans	<u>(144)</u>		<u>(144)</u>	
Change in cash flow derivative instruments				
Unrealized losses on interest rate caps	(608)			(608)
Reclassification of amount recognized in interest expense	<u>1,917</u>			<u>1,917</u>
Net change in cash flow derivative instruments	<u>1,309</u>			<u>1,309</u>
Total other comprehensive income (loss)	10,259	9,094	(144)	1,309
Balance, September 30, 2014	<u>\$ (22,854)</u>	<u>\$ (21,209)</u>	<u>\$ 1,498</u>	<u>\$ (3,143)</u>

The following table summarizes the changes in the balance of the components of AOCI for the nine months ended September 30, 2013:

	Total	Unrealized Gain on Securities	Retirement Benefit Plans	Cash Flow Derivative Instruments
Balance, January 1, 2013	\$ 27,833	\$ 34,104	\$ (56)	\$ (6,215)
Change in unrealized gains on available-for-sale securities				
Net change in unrealized gains on investment securities	(53,968)	(53,968)		
Decrease in noncredit portion of other-than-temporary impairment (OTTI) losses	1,139	1,139		
Reclassification adjustment for OTTI credit losses included in net income	143	143		
Net increase in unrealized losses on securities	<u>(52,686)</u>	<u>(52,686)</u>		
Change in postretirement benefit plans				
Amounts amortized into net periodic expense:				
Amortization of prior service credits	(143)		(143)	
Amortization of net losses	13		13	
Net change in postretirement benefit plans	<u>(130)</u>		<u>(130)</u>	
Change in cash flow derivative instruments				
Gains on interest rate caps	145			145
Reclassification of amount recognized in interest expense	1,067			1,067
Net change in cash flow derivative instruments	<u>1,212</u>			<u>1,212</u>
Total other comprehensive (loss) income	(51,604)	(52,686)	(130)	1,212
Balance, September 30, 2013	<u>\$ (23,771)</u>	<u>\$ (18,582)</u>	<u>\$ (186)</u>	<u>\$ (5,003)</u>

The following table summarizes reclassifications from AOCL to the Statements of Comprehensive Income for the nine months ended September 30:

Component of AOCL	Amount Reclassified from AOCL		Affected Line in the Statement of Comprehensive Income
	2014	2013	
Impairment losses on other-than-temporarily-impaired investments	\$ -	\$ 143	Impairment losses on investments
Amortization of net credits on post-retirement benefit plan	(144)	(130)	Salaries and employee benefits
Amortization on cash flow hedges	1,917	1,067	Interest expense
Total reclassifications	<u>\$ 1,773</u>	<u>\$ 1,080</u>	

NOTE 9 — SUBSEQUENT EVENTS

The bank has evaluated subsequent events through November 7, 2014, which is the date the financial statements were issued. There are no other significant subsequent events requiring disclosure as of November 7, 2014.

NOTE 10 — COMBINED ASSOCIATION FINANCIAL DATA

Condensed financial information for the associations follows. All significant transactions and balances between the associations are eliminated in combination. The multiemployer structure of certain of the district's retirement and benefit plans results in the recording of these plans only in the district's combined financial statements.

Balance sheet data	<u>September 30, 2014</u>	<u>December 31, 2013</u>
Cash	\$ 4,027	7,604
Investment securities	40,575	55,669
Loans	14,155,070	13,260,228
Less allowance for loan losses	52,771	60,504
Net loans	<u>14,102,299</u>	<u>13,199,724</u>
Accrued interest receivable	146,857	114,131
Other property owned, net	23,424	33,330
Other assets	370,974	334,355
Total assets	<u><u>\$ 14,688,156</u></u>	<u><u>\$ 13,744,813</u></u>
Notes payable	\$ 11,820,595	\$ 10,962,399
Other liabilities	162,078	312,219
Total liabilities	<u>11,982,673</u>	<u>11,274,618</u>
Capital stock and participation certificates	211,162	80,696
Retained earnings	2,492,556	2,387,250
Accumulated other comprehensive income	1,765	2,249
Total members' equity	<u>2,705,483</u>	<u>2,470,195</u>
Total liabilities and members' equity	<u><u>\$ 14,688,156</u></u>	<u><u>\$ 13,744,813</u></u>

Statement of income data	<u>Nine Months Ended September 30,</u>	
	<u>2014</u>	<u>2013</u>
Interest income	\$ 480,762	\$ 462,574
Interest expense	158,049	149,661
Net interest income	322,713	312,913
(Negative provision) provision for loan losses	(5,057)	6,151
Net interest income after (negative provision) provision for loan losses	327,770	306,762
Noninterest income	46,468	41,406
Other expense	127,099	128,043
Provision for income taxes	247	378
Net income	<u>246,892</u>	<u>219,747</u>
Other comprehensive loss:		
Change in postretirement benefit plans	(485)	(1,022)
Total other comprehensive loss	<u>(485)</u>	<u>(1,022)</u>
