Management's Discussion and Analysis of Financial Condition and Results of Operations

(dollars in thousands, except as noted)

The following discussion reviews the financial condition and results of operations of the Farm Credit Bank of Texas (bank) for the three and six months ended June 30, 2019. These comments should be read in conjunction with the accompanying financial statements and footnotes, along with the 2018 Annual Report to shareholders. The accompanying financial statements were prepared under the oversight of the bank's audit committee.

The bank is a member of the Farm Credit System (System), a nationwide network of cooperatively owned financial institutions established by and subject to the provisions of the Farm Credit Act of 1971, as amended, and the regulations of the Farm Credit Administration (FCA) promulgated thereunder.

The United States is currently served by three Farm Credit Banks (FCBs), each of which has specific authority to fund affiliated associations and other financing institutions (OFIs) which make loans to agricultural producers, farm-related businesses and rural homeowners within a regional chartered territory (or district), and by one Agricultural Credit Bank (ACB), which has the lending authority of an FCB within its chartered territory and nationwide authority to finance agricultural cooperatives and rural utilities. The FCBs and the ACB are collectively referred to as "System banks." As FCBs, the primary purpose of the System banks is to serve as a source of funding for System associations within their districts. The System associations make loans to or for the benefit of borrowers for qualified purposes. At June 30, 2019, the bank provided financing to 14 district associations and certain OFIs.

The accompanying financial statements exclude financial information of the bank's affiliated associations. The bank and its affiliated associations are collectively referred to as the "Texas District." The bank separately publishes certain unaudited combined financial information of the Texas District, including a condensed statement of condition and statement of income, which can be found on the bank's website at *www.farmcreditbank.com*. Such information is not incorporated by reference to, and should not be considered part of, this quarterly report.

RESULTS OF OPERATIONS

Net Income

Net income for the three months ended June 30, 2019, was \$50.6 million, an increase of \$11.7 million, or 30.04 percent, over the same period of 2018. The increase in net income primarily consisted of a \$7.7 million increase in noninterest income and a \$4.6 million increase in net interest income.

Net income for the six months ended June 30, 2019, was \$95.2 million, an increase of \$11.7 million, or 14.00 percent, over the same period of 2018. The increase in net income consisted of a \$7.2 million increase in net interest income, a \$4.4 million decrease in the provision for credit losses, and a \$2.0 million increase in noninterest income, offset by a \$1.9 million increase in noninterest expense.

Net Interest Income

Net interest income for the three months ended June 30, 2019, was \$66.4 million, an increase of \$4.6 million, or 7.35 percent, from the three months ended June 30, 2018. The increase in net interest income was attributable to a \$1.6 billion increase in the bank's average earning assets, offset by a 3-basis-point decrease in the net interest rate spread from 95 basis points to 92 basis points. The net interest margin of 108 basis points was the same for the three months ended June 30, 2019 and the three months ended June 30, 2018.

Net interest income for the six months ended June 30, 2019, was \$130.3 million, an increase of \$7.2 million, or 5.84 percent, from the six months ended June 30, 2018. The increase in net interest income was attributable to a \$1.6 billion increase in the bank's average earning assets, offset by a 4-basis-point decrease in the net interest rate spread from 96 basis points to 92 basis points. The net interest margin of 108 basis points for the six months ended June 30, 2019 was 1 basis point less than prior year. The increase in the bank's average earning assets included growth in its direct notes from associations, capital markets loan portfolio and investment portfolio for both periods presented.

Earning asset yields and liability costs are generally influenced by market interest rates and the inversion of the interest rate yield curve has persisted and deepened, contributing to the decline in the bank's net interest spread for the quarter and year-to-date. During the three months ended June 30, 2019, the bank called \$1.1 billion in debt and recognized \$1.9 million in concession expense as compared to no similar activities in the three months ended June 30, 2018. During the six months ended June 30, 2019, the bank called \$1.9 billion in debt and recognized \$3.5 million in concession expense as compared to no similar activities in the six months ended June 30, 2018.

Provision for Credit Losses

The bank's provision for credit losses for the three months ended June 30, 2019, totaled \$157, an increase of \$168 from the \$11 negative provision for credit losses from the same period of 2018.

The bank's provision for credit losses for the six months ended June 30, 2019, totaled \$417, a decrease of \$4.4 million from the \$4.8 million provision for credit losses from the same period of 2018. The decrease is primarily due to no significant reserves required in the first six months of 2019 on loans individually evaluated for impairment as compared to the six months ended June 30, 2018. The provision for credit losses for the six months ended June 30, 2018. The provision for credit losses for the six months ended June 30, 2019 reflected a higher level of overall lending activity and slight deterioration in credit quality.

Noninterest Income

Noninterest income for the three months ended June 30, 2019, was \$13.1 million, an increase of \$7.7 million, or 141.1 percent, over the same period of 2018. The increase was due mainly to a \$7.5 million gain resulting from the sale of investment securities during June 2019.

Noninterest income for the six months ended June 30, 2019, was \$22.4 million, an increase of \$2.0 million, or 9.55 percent, over the same period of 2018. The increase was due mainly to the \$7.5 million gain resulting from the sale of investment securities during June 2019, offset by lower refund distributions from the Farm Credit System Insurance Corporation (FCSIC) year-over-year.

Noninterest Expense

Noninterest expense for the three months ended June 30, 2019, was \$28.8 million, an increase of \$357, or 1.26 percent, over the same period of 2018.

Noninterest expense for the six months ended June 30, 2019, was \$57.1 million, an increase of \$1.9 million, or 3.42 percent, over the same period of 2018. The increase was primarily attributable to a \$1.7 million increase in computer software depreciation and maintenance expense.

| | Annualized for the | Annualized for the |

Other Comprehensive (Loss) Income

Other comprehensive (loss) income consists of certain gains, losses or costs for which values are included in assets or liabilities on the balance sheets, but which have not yet been recognized in earnings. In the balance sheets, they are included in accumulated other comprehensive (loss) income in the shareholders' equity section. For the bank, these elements include unrealized gains or losses on the bank's available-forsale investment portfolio, elements of certain postretirement benefit changes and changes in the value of cash flow derivative instruments.

The table below summarizes the changes in elements included in other comprehensive loss:

| | Six Montl June | Directo | |
|--|-------------------|------------|----|
| | 2019 | 2018 | |
| Change in unrealized gains (losses) on available-for-sale securities | | | |
| Change in net unrealized gains (losses) | \$ 82,853 | \$ (42,819 | り |
| Gain on sale reclassifications to net income | (7,516) | - | |
| Net change in unrealized gains (losses) on investment securities | 75,337 | (42,819 | り) |
| Change in postretirement benefit plans Amounts amortized into net periodic expense: | | | |
| Amortization of prior service credits | (39) | (23 | 5) |
| Net change in postretirement benefit plans | (39) | (23 |) |
| Change in cash flow derivative instruments | | | |

| Reclassification of (gain) loss recognized in interest expense | (101) | (196 | 6) |
| Net change in cash flow derivative instruments | (45,339) | 7,269 |) |
| Other comprehensive income (loss) | \$ 29,959 | \$ (35,573 |) |

FINANCIAL CONDITION

Loan Portfolio

Gross loan volume at June 30, 2019, was \$18.95 billion, an increase of \$889.9 million, or 4.93 percent, compared to \$18.06 billion at December 31, 2018. The increase in the loan portfolio is attributable to growth in the bank's direct notes from associations and the capital markets loan portfolio.

The bank's capital markets loan portfolio predominantly includes participations, syndications and purchased whole loans, along with other financing structures within our lending authorities. The bank also

refers to the capital markets portfolio as participations purchased. In addition to purchasing loans from our district associations, which may exceed their hold limits, the bank seeks the purchase of participations and syndications originated outside of the district's territory by other System institutions, commercial banks and other lenders. These loans may be held as earning assets of the bank or sub-participated to the associations or to other System entities.

The bank has purchased loan participations and Federal Agricultural Mortgage Corporation (Farmer Mac) guaranteed agricultural mortgage-backed securities (AMBS) from associations in Capitalized Participation Pool (CPP) transactions. As a condition of the transactions, the bank redeemed common stock in the amount of 2.0 percent of the par value of the loans purchased, and the associations purchased bank stock equal to 8.0 percent of the purchased loans' par value and 1.6 percent of the AMBS' par value. During June 2019, the bank purchased \$9.6 million in loan participations from an association, which resulted in a net stock issuance of \$578. CPP loans held at June 30, 2019, totaled \$127.8 million and were included in "Loans" on the balance sheet. The balance of the AMBS CPP was \$32.0 million at June 30, 2019, and is included in "Investment securities" on the balance sheet.

The bank may also purchase loans from district associations in Non-Capitalized Participation Pool (NCPP) transactions. As a condition of these transactions, the bank redeemed common stock in the amount of 2.0 percent of the par value of the loans purchased. There were no NCPP loan purchases for the six months ended June 30, 2019. The NCPP loans' balance was \$164.0 million at June 30, 2019 and is included in "Loans" on the balance sheet.

Loans classified under the Farm Credit Administration's Uniform Loan Classification System as "acceptable" or "other assets especially mentioned" were 99.5 percent of total loans and accrued interest at June 30, 2019, and 99.6 percent at December 31, 2018.

During the second quarter of 2019, the bank downgraded the direct loan to one of our affiliated associations to the special mention credit quality classification. As of June 30, 2019, the outstanding direct note balance totaled \$225.8 million. The bank's loans to our affiliated associations are collateralized by substantially all of the association assets, and the earnings, capital and loan loss reserves of the association provide a buffer against losses in their retail portfolio. The bank has not made any provision for loan loss or recorded any allowance for credit loss related to our direct note to that affiliated association.

The table below summarizes the balances of the bank's nonperforming assets at June 30, 2019, compared to the balances at December 31, 2018:

| | | | Change | | | | | |
|--------------------------------------|-----|------------|--------|-------|----------|-------|---------------|--|
| | Jun | e 30, 2019 | | \$ | % | Decem | nber 31, 2018 | |
| Nonaccrual loans | \$ | 18,979 | \$ | (507) | (2.60) % | \$ | 19,486 | |
| Accruing formally restructured loans | | 2,453 | | (78) | (3.08) | | 2,531 | |
| Total nonperforming assets | \$ | 21,432 | \$ | (585) | (2.66) % | \$ | 22,017 | |

The decrease in nonaccrual loans was due to repayments on loans since December 31, 2018. At June 30, 2019, and December 31, 2018, the bank did not have any nonaccrual loans on which cash payments are recognized as interest income and did not have any other property owned (OPO).

Impaired loans, consisting of nonaccrual loans and accruing formally restructured loans, and loans 90 days past due and still accruing interest, constituted 0.1 percent of gross loans at June 30, 2019, and December 31, 2018.

At June 30, 2019, the bank had reserves for credit losses totaling \$14,297, including an allowance for loan losses of \$12,161 and a reserve for credit losses on unfunded commitments of \$2,136 related to the bank's capital markets loan portfolio. The allowance for loan losses of \$12,161 equated to 0.1 percent of total loans outstanding and 0.2 percent of capital market loans outstanding. The \$2,136 reserve for losses on unfunded commitments predominantly included a general reserve for losses on unused loan commitments and for losses on letters of credit, representing management's estimate of probable credit losses related to unfunded commitments. Analysis indicates that an allowance on the association direct notes is not warranted, therefore the entire balance of the allowance and reserve for credit losses reflects reserves for risks identified in the bank's participation loans.

The allowance for loan losses as a percentage of impaired loans was 56.74 percent as of June 30, 2019, as compared to 54.39 percent as of December 31, 2018.

Liquidity and Funding Sources

The bank's primary source of liquidity comes from its ability to issue Systemwide Debt Securities, which are the general unsecured joint and several obligations of the System banks. The bank continually raises funds in the debt markets to support its mission, to repay maturing Systemwide Debt Securities, and to meet other obligations. As a secondary source of liquidity, the bank maintains an investment portfolio composed primarily of high-quality liquid securities. The securities provide a stable source of income for the bank, and their high quality ensures the portfolio can quickly be converted to cash should the need arise.

Cash and investment securities totaled \$5.68 billion, or 22.72 percent, of total assets at June 30, 2019, compared to \$6.13 billion, or 24.97 percent, at December 31, 2018. At June 30, 2019, the bank's cash balance was \$22,612, of which \$7,783 was held at the Federal Reserve Bank.

Each bank is required to maintain a minimum of 120 days of liquidity coverage on a continuous basis. The days of liquidity measurement refers to the number of days that maturing debt could be funded with eligible cash and investment securities. At June 30, 2019, the bank exceeded all applicable regulatory liquidity requirements and had 232 days of liquidity.

Investments

The bank's investments are all considered available for sale, and include a liquidity portfolio and a portfolio of other investments. The liquidity portfolio had a fair value of \$5.48 billion at June 30, 2019, and consisted primarily of federal agency-guaranteed collateralized mortgage-backed securities (MBS), corporate debt, agency-guaranteed debt, U.S. Treasury securities and asset-backed securities (ABS). The majority of the liquidity portfolio's MBS includes Government National Mortgage Association (GNMA), Federal National Mortgage Association (FNMA) and Federal Home Loan Mortgage Corporation (FHLMC) securities. The bank's other investments had a fair value of \$32.0 million at June 30, 2019 and consisted of Federal Agricultural Mortgage Corporation (Farmer Mac) guaranteed agricultural mortgage-backed securities are backed by loans originated by the associations.

Farmer Mac is a government-sponsored enterprise and is examined and regulated by the FCA. It provides a secondary market for agricultural and rural home mortgage loans that meet certain underwriting standards. Farmer Mac is authorized to provide loan guarantees and to be a direct pooler of agricultural mortgage loans. Farmer Mac is owned by both System and non-System investors, and its board of directors has both System and non-System representation. Farmer Mac is not liable for any debt or obligation of any System institution and no System institution other than Farmer Mac is liable for any debt or obligation of Farmer Mac.

| | June 30, 2019 | | | | December 31, 2018 | | | | | |
|-------------------------------|---------------|--------------|----|------------|-------------------|---------------------------|----|--------------|-------------|--|
| | Am | ortized Cost | F | Fair Value | | Fair Value Amortized Cost | | ortized Cost | t Fair Valu | |
| Agency-guaranteed debt | \$ | 156,987 | \$ | 156,741 | \$ | 170,800 | \$ | 167,923 | | |
| Corporate debt | | 445,313 | | 446,770 | | 365,382 | | 363,537 | | |
| Federal agency collateralized | | | | | | | | | | |
| mortgage-backed securities | | | | | | | | | | |
| GNMA | | 2,407,300 | | 2,409,394 | | 2,671,043 | | 2,630,995 | | |
| FNMA and FHLMC | | 2,038,667 | | 2,036,088 | | 2,157,582 | | 2,130,136 | | |
| U.S. Treasury securities | | 299,049 | | 299,402 | | 298,300 | | 298,083 | | |
| Asset-backed securities | | 131,885 | | 132,631 | | 88,292 | | 88,257 | | |
| Total liquidity investments | \$ | 5,479,201 | \$ | 5,481,026 | \$ | 5,751,399 | \$ | 5,678,931 | | |

The following table summarizes the bank's available-for-sale liquidity portfolio holdings:

The bank's other investments portfolio consisted of Farmer Mac AMBS securities as follows:

| | | June 30, 2019 | | | | December 31, 2018 | | | |
|---|-----|---------------|----|----------|-----|-------------------|----|----------|--|
| | Amo | rtized Cost | Fa | ir Value | Amo | rtized Cost | Fa | ir Value | |
| Agricultural mortgage-backed securities | \$ | 33,001 | \$ | 31,972 | \$ | 37,781 | \$ | 35,707 | |

FCA regulations also define eligible investments by specifying credit criteria and percentage of investment portfolio limit for each investment type. If an investment no longer meets the eligibility criteria, the investment becomes ineligible for inclusion in the liquidity portfolio. At June 30, 2019, the bank had no investments which were ineligible for liquidity purposes.

During the three and six months ended June 30, 2019, three investment securities were sold for total proceeds of \$272.8 million, resulting in gains of \$7.5 million recognized in noninterest income.

Capital Resources

At June 30, 2019, the bank's capital totaled \$1,869,623, and consisted of \$700,000 of Class B noncumulative subordinated perpetual preferred stock, \$317,041 of capital stock, \$904,316 of retained earnings and \$51,734 of accumulated other comprehensive loss. The capital balance reflected an increase of \$92,690 from December 31, 2018, due primarily to net income of \$95,175, a \$29,959 decrease in other comprehensive losses offset by \$28,225 in preferred stock dividends accrued, \$4,794 in patronage distributions and \$3 in issuance cost on preferred stock. The balance in accumulated other comprehensive loss of \$51,734 resulted from unrealized gains on investments of \$796, \$52,464 in unrealized losses on cash flow derivative instruments and \$66 in accumulated amortization of other postretirement benefits. The decrease in interest rates for the first six months of 2019 increased the fair value of the liquidity investments but lowered the valuation of the cash flow derivative instruments.

The following table reflects the bank's regulatory capital ratios as of:

| | | | Total |
|----------------------------|---------------|-------------------|------------|
| | | | Regulatory |
| | June 30, 2019 | December 31, 2018 | Minimums |
| Common equity tier 1 ratio | 9.61% | 9.92% | 7.00% |
| Tier 1 capital ratio | 15.88 | 16.29 | 8.50 |
| Total capital ratio | 16.01 | 16.42 | 10.50 |
| Permanent capital ratio | 15.90 | 16.31 | 7.00 |
| Tier 1 leverage ratio | 7.13 | 7.39 | 5.00 |
| UREE leverage ratio | 2.86 | 3.08 | 1.50 |

As of June 30, 2019, the bank exceeded all regulatory capital minimums.

CONDITIONS IN THE TEXAS DISTRICT

According to the Federal Reserve Bank of Dallas, non-farm employment in Texas increased by 2.4 percent from May 2018 through May 2019. Although Texas is the second largest state in the country by land area, economic growth is driven primarily by its urban centers. Increasing activity in these economic hubs, coupled with rising oil production in the Permian Basin, have been supportive of economic growth in recent years. With a relatively young population compared to the nation and a business-friendly environment, the Texas economy is likely to continue to perform well in the medium-term relative to the U.S. as a whole. In May, the state's unemployment rate reached a record low of 3.5 percent. In June, the Federal Reserve Bank of Dallas estimated that non-farm employment in Texas would grow by about 2.3 percent in 2019.

As of May 2019, non-farm employment growth has also been positive year-over-year in the remaining district states of Alabama, Louisiana, Mississippi and New Mexico.

West Texas Intermediate oil prices averaged about \$60 per barrel during the second quarter of 2019, according to U.S. Energy Information Administration data. Oil prices have been supported by the efforts undertaken by the Organization of the Petroleum Exporting Countries, along with its global partners, to reduce worldwide supplies of crude oil. In July, cooperating countries agreed to extend production cuts through the first quarter of 2020, which should benefit oil prices in the near-term. The U.S. produced a record 12.2 million barrels of crude oil per day in April, and production is likely to continue to rise in the coming months. Breakeven prices on new wells in the Permian Basin are about \$50 per barrel on average, according to a recent Federal Reserve Bank of Dallas survey. With West Texas Intermediate oil prices ending the second quarter at about \$58 per barrel, the U.S. shale industry appears to be well-positioned for profitability during the second half of 2019.

During the quarter, the U.S. Department of Agriculture (USDA) announced a new \$16 billion aid package intended to assist farmers that have been impacted by trade disruption and the imposition of tariffs by global trade partners. As of early July, details regarding specific payment rates for individual crops have not yet been communicated to the public. The U.S.-Mexico-Canada Agreement could be considered for ratification by the U.S. Congress within the next few months, but no formal timetable has been announced.

Agricultural producers across key regions of the country have been impacted by abnormal weather conditions during the first half of 2019. The National Oceanic and Atmospheric Administration reported that the 12-month period ending in April 2019 was the wettest on record for the continental U.S. Heavy precipitation in the Midwest caused widespread river flooding and delayed row crop planting. Above-average rainfall has generally been beneficial to U.S. cattle producers, however, as they are reaping the benefits of some of the best pasture and range conditions on record.

Cattle feeding profitability averaged around breakeven during the second quarter of 2019. Higher feed costs and reduced slaughter steer prices may pressure cattle feeding margins during the second half of the year. Many of the borrowers in the bank's participation portfolio that feed cattle employ hedging strategies or have marketing arrangements that minimize losses during market downturns.

U.S. pork prices have increased in response to the ongoing African Swine Fever outbreak in China, the world's largest producer and consumer of pork. It is likely to take some time for Chinese pork production to recover once the virus is fully eradicated. In the interim, China's reliance on imports of pork from other global producers, including the U.S., is expected to be elevated, which should be beneficial for the pork prices.

Broiler profitability has improved during 2019 and has generally been near the 10-year average. Margins reported by broiler producers are likely to decline seasonally during the second half of the year.

According to the USDA, prices received by U.S. dairy farmers for milk are expected to increase by more than 10 percent year-over-year in 2019. The price increase, if realized, will be beneficial for the dairy producers, who weathered a challenging economic environment in 2018.

The district is a crucial driver of global cotton production, as it accounts for nearly two-thirds of all U.S. farmland dedicated to the crop. Texas farmers are expected to plant about 7.2 million acres of cotton in 2019, the third highest level observed in the state since 1981. In June, the USDA estimated that U.S. cotton farmers would receive an average price of about \$0.64 per pound for the 2019 crop.

Farmers in the district utilize risk management tools, such as Federally-sponsored crop insurance programs and forward, futures and options contracts, to mitigate risk and enhance margins. The district portfolio continues to be supported by strong credit quality, high levels of capital, low advance rates and diversification.

RATING AGENCY ACTIONS

Fitch Ratings Actions

On April 3, 2019, Fitch Ratings affirmed the bank's long-term and short-term issuer default ratings (IDRs) at "AA-" and "F1+," respectively, with a stable outlook. Fitch also affirmed the bank's noncumulative perpetual preferred stock rating at "BBB" and its support floor at "AA-." Fitch affirmed the Farm Credit System's long-term and short-term IDRs at "AAA" and "F1+," respectively, with a stable outlook, and its support floor at "AAA." As a government-sponsored entity, the System benefits from implicit government support. The ratings and rating outlook are directly linked to the U.S. sovereign rating. The affirmation of the System banks' IDRs reflect their prudent, conservative credit culture, their unique funding advantage and their structural second-loss position on the majority of their loan portfolio.

Moody's Investors Service Rating Actions

On November 20, 2018, Moody's Investors Service affirmed the bank's issuer rating at "Aa3" and its noncumulative preferred stock rating at "Baa1 (hyb)," with a stable outlook. The Aa3 issuer rating reflects the bank's "a1" baseline credit assessment (BCA), very high cooperative support from the other Federal Farm Credit Banks and moderate support from the U.S. government, which has an "Aaa," stable outlook. The bank's preferred stock rating incorporated the bank's BCA, very high cooperative support from the other Federal Farm Credit Banks and the debt's relative positions in the bank's capital structure. The bank's "a1" BCA incorporates its solid capital levels, adequate risk-adjusted profitability and liquidity, as well as the benefits associated with its lending to related associations and their strong capital levels. The "a1" BCA is one of Moody's highest assessments of any financial institution, both domestically and globally.

REGULATORY MATTERS

At June 30, 2019, there were no district associations under written agreements with the Farm Credit Administration.

On June 12, 2018, the Farm Credit Administration (FCA) published a final rule revising the requirements governing the eligibility of investments for System banks and associations. The stated objectives of the final rule were as follows:

- To strengthen investment practices at System banks and associations to enhance their safety and soundness;
- To ensure that System banks hold sufficient high-quality liquid investments for liquidity purposes;
- To enhance the ability of the System banks to supply credit to agricultural and aquatic producers and their cooperatives in times of financial stress;
- To comply with the requirements of section 939A of the Dodd-Frank Act;
- To modernize the investment eligibility criteria for System banks; and
- To revise the investment regulation for System associations to improve their investment management practices so they are more resilient to risk.

The regulation became effective January 1, 2019. On July 3, 2018, a correction to the final rule on investment eligibility was published in the Federal Register.

On January 22, 2019, the Farm Credit Administration issued an information memorandum citing the fact that effective December 20, 2018, the Agriculture Improvement Act of 2018 repealed the limitations on bank director compensation contained in section 4.21 of the Farm Credit Act of 1971, as amended. As a result, beginning in 2019, the Farm Credit Administration will no longer calculate the maximum annual compensation adjustments in FCA regulation § 611.400(b)(c), but will continue to review System bank director compensation to ensure that pay levels do not adversely affect the safety and soundness of System institutions.

On February 21, 2019, an advance notice of proposed rulemaking on ways to collect, evaluate, and report data on the System's service to young, beginning, and small farmers (YBS) was published in the Federal Register. The purpose of the advance notice of proposed rulemaking is to gather public input on how FCA might:

- Improve the accuracy, transparency, and process by which FCA ensures that YBS Farmer data is properly collected and reported by the System;
- Clarify the definitions of terms related to the collection, reporting, and identification of YBS Farmer data;
- Ensure the definitions of YBS Farmers and related terms remain relevant and reflective of the evolving agricultural economy; and
- Evaluate the effectiveness of each System institution's YBS program to achieve its mission of serving YBS Farmers.

The comment period ended on May 22, 2019.

On March 19, 2019, an interim final rule on margin and capital requirements for covered swap entities was published in the Federal Register. Five federal agencies acted to ensure that qualifying swaps may be transferred from a United Kingdom (UK) entity to an affiliate in the European Union (EU) or the United States without triggering new margin requirements. The interim final rule adopted would ensure that any legacy swap currently exempt from the agencies' rule on margin for non-cleared swaps would not become

subject to the rule if such swap is amended solely for the purpose of transferring it to an affiliate as a result of a non-negotiated UK withdrawal from the EU. The comment period ended on April 18, 2019.

On April 3, 2019, a proposed rule was published in the Federal Register on the criteria for reinstating nonaccrual loans. The objectives of the proposed rule are to:

- Enhance the usefulness of high-risk loan categories;
- Replace the subjective measure of "reasonable doubt" used for reinstating loans to accrual status with a measurable standard;
- Improve the timely recognition of a change in a loan's status; and
- Update existing terminology and make other grammatical changes.

The comment period ended on June 3, 2019.

Report of Management

The undersigned certify that we have reviewed the June 30, 2019, quarterly report of the Farm Credit Bank of Texas, that the report has been prepared in accordance with all applicable statutory or regulatory requirements, and that the information included herein is true, accurate and complete to the best of our knowledge and belief.

James F. Dodson Chairman of the Board

Controls and Procedures

As of June 30, 2019, management of the Farm Credit Bank of Texas (bank) carried out an evaluation with the participation of the bank's management, including the chief executive officer (CEO) and senior vice president, chief financial officer (CFO), of the effectiveness of the design and operation of the respective disclosure controls and procedures⁽¹⁾ with respect to this quarterly report. This evaluation is based on testing of the design and effectiveness of key internal controls, certifications and other information furnished by the principal executive officer and principal financial officer of the bank, as well as incremental procedures performed by the bank. Based upon and as of the date of the bank's evaluation, the CEO and the CFO concluded that the disclosure controls and procedures are effective in alerting them on a timely basis of any material information relating to the bank that is required to be disclosed by the bank in the annual and quarterly information statements it files or submits to the Farm Credit Administration.

There have been no significant changes in the bank's internal control over financial reporting⁽²⁾ that occurred during the quarter ended June 30, 2019, that have materially affected, or are reasonably likely to materially affect, the bank's internal control over financial reporting.

Amie Pala Senior Vice President, Chief Financial Officer

⁽¹⁾ For purposes of this discussion, "disclosure controls and procedures" are defined as controls and procedures of the bank that are designed to ensure that the financial information required to be disclosed by the bank in this quarterly information statement is recorded, processed, summarized and reported within the time periods specified under the rules and regulations of the Farm Credit Administration.

⁽²⁾ For purposes of this discussion, "internal control over financial reporting" is defined as a process designed by, or under the supervision of, the bank's principal executive officer and principal financial officer, or persons performing similar functions, and effected by the bank's boards of directors, management and other personnel, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the bank's financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the bank; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of the bank's financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the bank are being made only in accordance with uthorizations of management and directors of the bank; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the bank's assets that could have a material effect on the bank's financial statements.

CERTIFICATION

I, Larry R. Doyle, chief executive officer of Farm Credit Bank of Texas (bank), a federally chartered instrumentality under the Farm Credit Act of 1971, as amended, certify that:

- 1. I have reviewed this quarterly report of the bank;
- 2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
- 3. Based on my knowledge, the financial statements and other financial information included in this report fairly present in all material respects the financial condition, results of operations and cash flows of the bank as of, and for, the periods presented in this report;
- 4. The bank's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures and internal control over financial reporting for the bank and have:
 - a. designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the bank is made known to us by others, particularly during the period in which this report is being prepared;
 - b. designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. evaluated the effectiveness of the bank's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. disclosed in this report any change in the bank's internal control over financial reporting that occurred during the bank's most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the bank's internal control over financial reporting; and
- 5. The bank's other certifying officer and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the bank's auditors and the audit committee of the bank's board of directors (or persons performing the equivalent functions):
 - a. all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the bank's ability to record, process, summarize and report financial information; and
 - b. any fraud, whether or not material, that involves management or other employees who have a significant role in the bank's internal control over financial reporting.

Notes to Financial Statements

Unaudited (dollar amounts in thousands unless otherwise noted)

NOTE 1 — ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements include the accounts of the Farm Credit Bank of Texas (bank). The significant accounting policies followed and the financial condition and results of operations of the bank as of and for the year ended December 31, 2018, are contained in the 2018 Annual Report to shareholders (Annual Report). These unaudited second quarter 2019 financial statements should be read in conjunction with the Annual Report.

In the opinion of management, the accompanying unaudited financial statements contain all adjustments necessary for a fair presentation of the interim financial condition and results of operations of the bank, and conform to generally accepted accounting principles. The preparation of these financial statements requires the use of management's estimates. The results of operations for any interim period are not necessarily indicative of the results to be expected for the entire year.

The bank and its affiliated associations (Texas District) are part of the federally chartered Farm Credit System (System). The bank provides funding to district associations, which, in turn, provide credit to their borrower-members. At June 30, 2019, the bank provided financing to 14 district associations and certain other financing institutions.

In May 2019, the Financial Accounting Standards Board (FASB) issued guidance entitled "Financial Instruments — Credit Losses, Targeted Transition Relief." The guidance provides entities that have certain instruments within the scope of Subtopic 326-20, Financial Instruments — Credit Losses — Measured at Amortized Cost, with an option to irrevocably elect the fair value option, applied on an instrument-by-instrument basis for eligible instruments, upon adoption of Topic 326, Measurement of Credit Losses on Financial Instruments. The guidance becomes effective for interim and annual periods beginning after December 15, 2020, with early adoption permitted. The bank is evaluating the impact of adoption on the bank's financial condition and its results of operations.

In August 2018, the FASB issued guidance entitled "Customer's Accounting for Implementation Costs Incurred in a Cloud Computing Arrangement that is a Service Cost." The guidance aligns the requirements for capitalizing implementation costs incurred in a hosting arrangement that is a service contract with the requirements for capitalizing implementation costs incurred to develop or obtain internal-use software (and hosting arrangements that include an internal-use software license). The accounting for the service element of a hosting arrangement that is a service contract is not affected by this guidance. This guidance becomes effective for interim and annual periods beginning after December 15, 2019. The guidance also requires an entity (customer) to expense the capitalized implementation costs of a hosting arrangement that is a service contract over the term of the hosting arrangement. It further specifies where to present expense and payments in the financial statements. Early adoption is permitted. The guidance is to be applied on a retrospective or prospective basis to all implementation costs incurred after the date of adoption. The bank is evaluating the impact of adoption on the bank's financial condition and its results of operations.

In August 2018, the FASB issued guidance entitled "Disclosure Framework — Changes to the Disclosure Requirements for Defined Benefit Plans." The guidance modifies the disclosure requirements for employers that sponsor defined benefit pension or other postretirement plans. This guidance becomes effective for fiscal years ending after December 15, 2020. Early adoption is permitted. The guidance is to

be applied on a retrospective basis for all periods. The bank is evaluating the impact of adoption on the bank's financial condition and its results of operations.

In August 2018, the FASB issued guidance entitled "Disclosure Framework — Changes to the Disclosure Requirements for Fair Value Measurement." The guidance modifies the requirements on fair value measurements by removing, modifying or adding to the disclosures. This guidance becomes effective for interim and annual periods beginning after December 15, 2019. Early adoption is permitted and an entity is permitted to early adopt any removal or modified disclosures and delay adoption of the additional disclosures until their effective date. The bank is evaluating the impact of adoption on the bank's financial condition and its results of operations.

In August 2017, the FASB issued guidance entitled "Targeted Improvements to Accounting for Hedging Activities." The guidance better aligns an entity's risk management activities and financial reporting for hedging relationships through changes to both the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results. The amendments in this guidance require an entity to present the earnings effect of the hedging instrument in the same income statement line item in which the earnings effect of the hedged item is reported. This guidance also addresses the timing of effectiveness testing, qualitative and quantitative effectiveness testing, and components that can be excluded from effectiveness testing. This guidance became effective for interim and annual periods beginning after December 15, 2018. The adoption of this guidance did not materially impact the bank's financial condition or its results of operations.

In June 2016, the FASB issued guidance entitled "Measurement of Credit Losses on Financial Instruments." The guidance replaces the current incurred loss impairment methodology with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to develop credit loss estimates. Credit losses relating to available-for-sale securities would also be recorded through an allowance for credit losses. For public business entities that are not U.S. Securities and Exchange Commission filers, this guidance becomes effective for interim and annual periods beginning after December 15, 2020, with early application permitted. The bank is evaluating the impact of adoption on the bank's financial condition and its results of operations.

In February 2016, the FASB issued guidance entitled "Leases." The guidance requires the recognition by lessees of lease assets and lease liabilities on the balance sheet for the rights and obligations created by those leases. Leases with lease terms of more than 12 months are impacted by this guidance. This guidance became effective for interim and annual periods beginning after December 15, 2018. The adoption of this guidance did not materially impact the bank's financial condition or its results of operations but did impact the lease disclosures. The bank adopted this guidance on January 1, 2019 and upon adoption, recorded a \$10.9 million right of use asset and a \$14.2 million lease liability. The bank elected the hindsight and certain practical expedients, which among other things, allowed for the carry forward of the historical lease classification and the determination of the lease term for existing leases.

NOTE 2 — INVESTMENTS

Investments Available-for-Sale

The bank's available-for-sale investments include a liquidity portfolio and a portfolio of other investments. The liquidity portfolio consists primarily of mortgage-backed securities (MBS), corporate debt, agency-guaranteed debt, U.S. Treasury securities and asset-backed securities (ABS). The majority of the liquidity portfolio's MBS were federal agency-guaranteed collateralized MBS, including

Government National Mortgage Association (GNMA), Federal National Mortgage Association (FNMA) and Federal Home Loan Mortgage Corporation (FHLMC) securities. The bank's other investments portfolio consists of Federal Agricultural Mortgage Corporation (Farmer Mac) guaranteed agricultural mortgage-backed securities (AMBS) purchased from district associations.

During the three and six months ended June 30, 2019, three investment securities were sold for total proceeds of \$272.8 million with a combined book value of \$265.3 million, resulting in gains of \$7.5 million recognized in noninterest income and previously reflected in accumulated other comprehensive loss. The bank uses the specific identification method to determine the cost of securities sold.

A summary of the amortized cost and fair value of investment securities available-for-sale at June 30, 2019, and December 31, 2018, is included in the following tables.

Investments in the available-for-sale liquidity portfolio at June 30, 2019:

| | | mortized Cost | Ur | Gross realized Gains | Gross nrealized Losses | Fair Value | Weighted Average Yield | |
|---|----|------------------|----|----------------------------|------------------------------|-----------------|------------------------------|---|
| Agency-guaranteed debt | \$ | 156,987 | \$ | 550 | \$ (796) | \$ 156,741 | 2.20 % | , |
| Corporate debt | | 445,313 | | 1,478 | (21) | 446,770 | 2.82 | |
| Federal agency collateralized mortgage-backed securities | | | | | | | | |
| GNMA | | 2,407,300 | | 16,247 | (14,153) | 2,409,394 | 2.57 | |

Other-Than-Temporarily Impaired Investments Evaluation

The following table shows available-for-sale liquidity portfolio investments by gross unrealized losses and fair value, aggregated by investment category and length of time, for securities that have been in a continuous unrealized loss position at June 30, 2019. The continuous loss position is based on the date the impairment was first identified:

| | Less 12 M | | | | Greater 12 Mo | | | Tot | al | | | |
|---|-------------------|----|----------------------|---|------------------|----|----------------------|---------------|----|--------------------|--|--|
| | Fair Value | U | Inrealized Losses | | Fair Value | ι | Inrealized Losses | Fair Value | | realized Losses | | |
| Agency-guaranteed debt | \$ 4,485 | \$ | (3) \$ | 5 | 70,164 | \$ | (793) \$ | 74,649 | \$ | (796) | | |
| Corporate debt | - | | - | | 25,071 | | (21) | 25,071 | | (21) | | |
| Federal agency collateralized mortgage-backed securities | | | | | | | | | | | | |
| GNMA | 188,211 | | (338) | | 1,196,302 | | (13,815) | 1,384,513 | | (14,153) | | |
| FNMA and FHLMC | 320,774 | | (904) | | 948,971 | | (7,821) | 1,269,745 | | (8,725) | | |
| U.S. Treasury securities | - | | - | | - | | - | - | | - | | |
| Asset-backed securities | - | | - | | 5,384 | | - | 5,384 | | - | | |
| Total | \$ 513,470 | \$ | (1,245) \$ | 5 | 2,245,892 | \$ | (22,450) \$ | 2,759,362 | \$ | (23,695) | | |

The bank evaluates investment securities for other-than-temporary impairment (OTTI) on a quarterly basis. Impairment is considered to be other than temporary if an entity (i) intends to sell the security, (ii) is more likely than not to be required to sell the security before recovering its cost or (iii) does not expect to recover the security's entire amortized cost basis (even if the entity does not intend to sell). For the six months ended June 30, 2019 and 2018, the bank did not recognize any other-than-temporary impairment credit losses and no securities were identified as OTTI at June 30, 2019 and 2018.

NOTE 3 — LOANS AND RESERVES FOR CREDIT LOSSES

Loans, including direct notes to district associations and other financing institutions (OFIs), participations purchased and other bank-owned loans, comprised the following categories at:

| | Ju | ne 30, 2019 | Decem | ber 31, 2018 |
|--------------------------------|----|-------------|-------|--------------|
| Direct notes receivable from | | | | |
| district associations and OFIs | \$ | 12,519,819 | \$ | 11,823,267 |
| Participations purchased | | 6,426,531 | | 6,233,167 |
| Other bank-owned loans | | 229 | | 252 |
| Total loans | \$ | 18,946,579 | \$ | 18,056,686 |

| | Ju | ıne 30, 2019 | Decem | ber 31, 2018 |
|---------------------------------------|----|--------------|-------|--------------|
| Direct notes receivable from | | | | |
| district associations | \$ | 12,478,924 | \$ | 11,786,926 |

| Production and intermediate term | | 684,315 | | 731,302 |
| Agribusiness | | | | |
| Loans to cooperatives | | 384,446 | | 321,233 |
| Processing and marketing | | 2,828,315 | | 2,658,208 |
| Farm-related business | | 64,074 | | 49,278 |
| Communication | | 457,695 | | 408,135 |
| Energy (rural utilities) | | 1,166,622 | | 1,199,509 |
| Water and waste disposal | | 110,777 | | 126,785 |
| Lease receivables | | 12,772 | | 13,420 |
| Loans to other financing institutions | | 40,895 | | 36,341 |
| Mission-related | | 16,198 | | 16,275 |
| Total loans | \$ | 18,946,579 | \$ | 18,056,686 |

A summary of the bank's loans by type follows:

The bank's capital markets loan portfolio predominantly includes participations, syndications and purchased whole loans, along with other financing structures within our lending authorities. The bank also refers to the capital markets portfolio as participations purchased. In addition to purchasing loans from our district associations, which may exceed their hold limits, the bank seeks the purchase of participations and syndications originated outside of the district's territory by other System institutions, commercial banks and other lenders. These loans may be held as earning assets of the bank or sub-participated to the associations or other System entities.

The bank purchases or sells participation interests with other parties in order to diversify risk, manage loan volume and comply with Farm Credit Administration regulations.

The following table presents information regarding the balances of participations purchased and sold, excluding syndications, at June 30, 2019.

| | Oth | ier Farm Cr | Institutions | Non | -Farm Cre | dit I | nstitutions | Total | | | | |

| Total | \$ | 6,643,125 | \$ | 6,242,524 | \$ | 27,935 | \$ | 17,279 | \$ | 6,671,060 | \$ | 6,259,803 |

The following table presents information regarding the balances of loan participations, excluding syndications, at December 31, 2018:

The bank has purchased loan participations and Federal Agricultural Mortgage Corporation (Farmer Mac) guaranteed agricultural mortgage-backed securities (AMBS) from associations in Capitalized Participation Pool (CPP) transactions. As a condition of the transactions, the bank redeemed common stock in the amount of 2.0 percent of the par value of the loans purchased, and the associations purchased bank stock equal to 8.0 percent of the purchased loans' par value and 1.6 percent of the AMBS' par value. During June 2019, the bank purchased \$9.6 million in loan participations from an association, which resulted in a net stock issuance of \$578. CPP loans held at June 30, 2019, totaled \$127.8 million and were included in "Loans" on the balance sheet. The balance of the AMBS CPP was \$32.0 million at June 30, 2019, and is included in "Investment securities" on the balance sheet.

The bank may also purchase loans from district associations in Non-Capitalized Participation Pool (NCPP) transactions. As a condition of these transactions, the bank redeemed common stock in the amount of 2.0 percent of the par value of the loans purchased. There were no NCPP loan purchases for the six months ended June 30, 2019. The NCPP loans' balance was \$164.0 million at June 30, 2019, and is included in "Loans" on the balance sheet.

The bank is authorized under the Farm Credit Act to accept "advance conditional payments" (ACPs) from borrowers. To the extent the borrower's access to such ACPs is restricted and the legal right of setoff exists, the ACPs are netted against the borrower's related loan balance. Unrestricted advance conditional payments are included in other liabilities. ACPs are not insured, and interest is generally paid by the bank on such balances. There were no significant balances of ACPs at June 30, 2019, or December 31, 2018.

During 2012, the bank elected the fair value option for certain callable loans purchased on the secondary market at a significant premium. The fair value option provides an irrevocable option to elect fair value as an alternative measurement for selected financial assets. At December 31, 2018, the fair value and unpaid principal balance of the loans held under the fair value option were \$9,345 and \$9,160 respectively. The loans held under the fair value option matured during the second quarter of 2019 and thus no balance is reflected at June 30, 2019. Fair value was used for both the initial and subsequent measurement of the designated instrument, with the changes in fair value recognized in net income. On these instruments, the related contractual interest income and premium amortization were recorded as Interest Income in the Statements of Comprehensive Income. The remaining changes in fair value on these instruments were recorded as net gains (losses) in "Noninterest Income" on the statements of comprehensive income. The fair value of these instruments was included in Level 2 in the fair value hierarchy for assets recorded at fair value on a recurring basis at December 31, 2018.

The following is a summary of the transactions on loans for which the fair value option has been elected for the six months ended June 30, 2019:

| Balance at January 1, 2019 | \$ 9,345 |
|-----------------------------------|-------------|
| Net loss on financial instruments | |
| under fair value option | (40) |
| Maturities | (9,160) |
| Premium amortization | (145) |
| Balance at June 30, 2019 | \$ - |

Nonperforming assets (including related accrued interest) and related credit quality statistics are as follows:

| | June 30, 2019 | | | ber 31, 2018 |
|--|---------------|----------------------------------|----|----------------------------------|
| Nonaccrual loans: Energy & water/waste disposal Agribusiness Real estate mortgage Total nonaccrual loans | \$ | 10,477 7,677 825 18,979 | \$ | 10,276 8,257 953 19,486 |
| Accruing restructured loans: Mission-related Total accruing restructured loans | | 2,453 2,453 | | 2,531 2,531 |
| Total nonperforming assets | \$ | 21,432 | \$ | 22,017 |

The bank and associations use the Farm Credit Administration Uniform Loan Classification System as a key metric in assessing the credit quality of their loans. The Farm Credit Administration Uniform Loan Classification System has five categories as follows:

- Acceptable assets are expected to be fully collectible and represent the highest quality;
- Other assets especially mentioned (OAEM) assets are currently collectible but exhibit some potential weakness;
- Substandard assets exhibit some serious weakness in repayment capacity, equity and/or collateral pledged on the loan;
- Doubtful assets exhibit similar weaknesses to substandard assets; however, doubtful assets have additional weaknesses in existing factors, conditions and values that make collection in full highly questionable; and
- Loss assets are considered uncollectible.

The following table shows loans and related accrued interest as a percentage of total loans and related accrued interest receivable by loan type as of:

| | June 30, 2019 | | December 31, 2018 | |
|--|---------------------|------------|-------------------|----------|

At June 30, 2019, impaired loans of \$17.6 million had a related specific allowance of \$6.2 million, while the remaining \$3.8 million of impaired loans had no related specific allowance as a result of adequate collateralization.

The average recorded investment in impaired loans for the three months ended June 30, 2019, was \$20.8 million. The bank recognized interest income of \$39 on impaired loans during the three months ended June 30, 2019.

The average recorded investment in impaired loans for the six months ended June 30, 2019, was \$20.9 million. The bank recognized interest income of \$78 on impaired loans during the six months ended June 30, 2019.

A summary of changes in the allowance for loan losses and period-end recorded investment in loans is as follows:

* Reserve for losses on letters of credit recorded in other liabilities

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. Troubled debt restructurings are undertaken in order to improve the likelihood of recovery on the loan and may include, but are not limited to, forgiveness of principal or interest, interest rate reductions that are lower than the current market rate for new debt with similar risk, or significant term or payment extensions.

As of June 30, 2019, the total recorded investment in TDR loans was \$11.0 million, including \$8.5 million classified as nonaccrual and \$2.5 million classified as accrual, with specific allowance for loan losses of \$3.5 million. Additional commitments to lend to borrowers whose loans have been modified in TDRs were \$1.0 million at June 30, 2019, and there were no additional commitments to lend to borrowers whose loans have been modified in TDRs at December 31, 2018.

The following table summarizes TDR loan balances by loan type:

| | | Loans Modifi | ed as TDI | Rs | | TDRs in Nona | ccrual Status | | | | |
|----------------------|------|--------------|-----------|--------------|------|--------------|---------------|--------------|--|--|--|
| | June | e 30, 2019 | Decem | ber 31, 2018 | June | 30, 2019 | Decem | per 31, 2018 | | | |
| Agribusiness | \$ | 7,771 | \$ | 7,684 | \$ | 7,771 | \$ | 7,684 | | | |
| Real estate mortgage | | 825 | | 1,236 | | 825 | | 1,236 | | | |
| Mission-related | | 2,453 | | 2,531 | | | | | | | |
| Total | \$ | 11,049 | \$ | 11,451 | \$ | 8,596 | \$ | 8,920 | | | |

There were no loans designated as troubled debt restructurings during the three or six months ended June 30, 2019. During the period there were no payment defaults on loans that were restructured during the previous 12 months. A payment default is defined as a payment that is 30 days past due after the date the loan was restructured.

The following tables present additional information regarding troubled debt restructurings, which includes both accrual and nonaccrual loans with troubled debt restructuring designation, that occurred during the three and six months ended June 30, 2018. The premodification outstanding recorded investment represents the recorded investment of the loans as of the quarter end prior to the restructuring.

For the three months ended June 30, 2018:

| | Pren | nodification | Postr | nodification |
|-------------------------------|---------|---------------|---------|---------------|
| | Outstan | ding Recorded | Ou | tstanding |
| | In | vestment | Recorde | ed Investment |
| Troubled debt restructurings: | | | | |
| Agribusiness | \$ | 7,739 | \$ | 8,588 |
| Total | \$ | 7,739 | \$ | 8,588 |

For the six months ended June 30, 2018:

| | Premodi | odification | | | | |
|-------------------------------|--------------------------------|-------------|---------|--------------|--|--|
| | Outstanding Recorded Outstandi | | | | | |
| | Investi | ment | Recorde | d Investment | | |
| Troubled debt restructurings: | | | | | | |
| Agribusiness | \$ | 7,739 | \$ | 8,588 | | |
| Total | \$ | 7,739 | \$ | 8,588 | | |

NOTE 4 — LEASES

The bank evaluates arrangements at inception to determine if it meets the criteria for a lease. Leases with an initial term of twelve months or less are not recorded on the balance sheet with lease expense recognized on a straight-line basis over the lease term. Operating leases are included in other assets for right-of-use (ROU) assets and other liabilities for lease liabilities on the balance sheet.

ROU assets represent the bank's right to use an underlying asset for the lease term and lease liabilities represent the bank's obligation to make lease payments arising from the lease. Operating ROU assets and liabilities are recognized based on the present value of the lease payments over the lease term. The bank's lease terms may include options to extend or terminate the lease when it is reasonably certain that the bank will exercise that option. Lease expense for lease payments is recognized on a straight-line basis over the lease term.

On September 30, 2003, the bank entered into a lease for approximately 102,500 square feet of office space to house its headquarters facility. The lease was effective September 30, 2003 and its term was from September 1, 2003 to August 31, 2013. On November 16, 2010, the bank entered into a lease amendment which extended the term of the lease to August 3, 2024. In addition, the lease amendment included expansion of the leased space to approximately 111,500 square feet of office space. Under the terms of the lease amendment, the bank will pay annual base rental ranging from \$18 per square foot in the first year to \$26 per square foot in the last year. Lease expenses for the facility including certain operating expenses passed through from the landlord were \$2,032 and \$2,090 for the six months ended June 30, 2019, and 2018, respectively.

The bank entered into a lease for copiers and a lease for postage machines on September 15, 2016, and June 1, 2017, respectively. The copier lease was effective September 15, 2016 and its term is from September 15, 2016 to March 15, 2020. The postage lease was effective June 1, 2017 and its term is from June 1, 2017 to August 31, 2020. Lease expenses for the copiers and postage were \$136 and \$118 for the six months ended June 30, 2019, and 2018, respectively.

Adoption of the leasing standard is as follows:

| | Balance Sheet Classification | As of 1e 30, 2019 | As Previously Reported December 31, 2018 | S | Lease tandard ljustment | s Restated ary 1, 2019 |
|------------------|--|----------------------|--|----|-------------------------------|-------------------------------|
| Operating leases | Operating lease right-of-use asset-building Operating lease right-of-use | \$ 9,806 | \$ - | \$ | 10,658 | \$ 10,658 |
| | asset-other | 172 | - | | 281 | 281 |
| Total lease ass | ets | \$ 9,978 | \$ - | \$ | 10,939 | \$ 10,939 |
| Operating leases | Operating lease right-of-use liabilities-building Operating lease right-of-use | \$ 12,901 | \$ - | \$ | 13,942 | \$ 13,942 |
| | liabilities-other | 173 | - | | 281 | 281 |
| Total lease liab | vilities | \$ 13,074 | \$ - | \$ | 14,223 | \$ 14,223 |

The components of lease expense were as follows:

| Classification on Statement | Six Months Ended | | | | | |
|-----------------------------|------------------|-------|--|--|--|--|
| of Comprehensive Income | June 30, 2019 | | | | | |
| Occupancy and equipment | \$ | 2,168 | | | | |

Other information related to leases was as follows:

| | Six | Months Ended | | |
|---|---------------|--------------|--|--|
| | June 30, 2019 | | | |
| Cash paid for amounts included in the measurement of lease liabilities: | | | | |
| Operating cash flows for operating leases | \$ | 1,340 | | |
| Right-of-use assets obtained in exchange for new lease obligations: | | | | |
| Operating leases | \$ | - | | |

The weighted-average remaining lease term for the building, copier and postage leases is 5.11 years and the weighted-average discount rate is 2.83 percent. The discount rates were determined using the bank's incremental borrowing rate for bonds for terms relative to the lease terms. The following are the undiscounted cash flows for the operating leases at June 30, 2019:

| | Maturities of Lease Liabilities | | | | |
|-------------------------------|------------------------------------|--------|--|--|--|
| Remainder of 2019 | \$ | 1,364 | | | |
| 2020 | | 2,619 | | | |
| 2021 | | 2,633 | | | |
| 2022 | | 2,712 | | | |
| 2023 | | 2,793 | | | |
| Thereafter | | 1,898 | | | |
| Total undiscounted cash flows | | 14,019 | | | |
| Less interest expense | | 945 | | | |
| Lease liability | \$ | 13,074 | | | |

The lease expense for leases with terms of 12 months or less was \$107 and \$16 for the six months ended June 30, 2019, and 2018, respectively.

NOTE 5 — COMMITMENTS AND CONTINGENCIES

The bank is primarily liable for its portion of Systemwide debt obligations. Additionally, the bank is jointly and severally liable for the consolidated Systemwide bonds and notes of the other System banks. Total consolidated bank and Systemwide obligations of the System at June 30, 2019, were approximately \$283.54 billion.

In the normal course of business, the bank has various outstanding commitments and contingent liabilities, including the possibility of actions against the bank in which claims for monetary damages may be asserted. Management and legal counsel are not aware of any other pending lawsuits or actions. Upon the basis of current information, management and legal counsel are of the opinion that the ultimate liability, if any, resulting from lawsuits or other pending actions will not be material in relation to the financial position, results of operations or cash flows of the bank.

NOTE 6 — FAIR VALUE MEASUREMENTS

Accounting guidance defines fair value as the exchange price that would be received for an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability. See Note 2, "Summary of Significant Accounting Policies," of the 2018 Annual Report for a more complete description.

Assets and liabilities recorded at fair value on a recurring basis at June 30, 2019, for each of the fair value hierarchy levels are summarized below:

| | Fair Value Measurements | | | | | | | | | |
|--|-------------------------|-----------|-------------------------|--------------|----|-------------|--------------|-------------|--|--|
| | | | Q | uoted Prices | | | | | | |
| | | | in Active | | | Significant | | Significant | | |

| Balance at June 30, 2019 | \$ | - | \$ | 40,338 | \$ | 31,972 | \$ | 489 | \$ 71,821 |

There were no transfers of assets or liabilities into or out of Level 1 from other levels during the three and six months ended June 30, 2019. Agricultural mortgage-backed securities (AMBS) are included in Level 3 due to limited activity or less transparency around inputs to their valuation. Mortgage-backed securities (or MBS) and asset-backed securities (or ABS) were included in Level 3 due to the fact that their valuation was based on Level 3 criteria (broker quotes). Transfers out of Level 3 occur at quarter end at the time information from pricing vendors becomes available. The liability for letters of credit are included in Level 3 as their valuation, based on fees currently charged for similar agreements, may not closely correlate to a fair value for instruments that are not regularly traded in the secondary market.

Assets and liabilities measured at fair value on a nonrecurring basis at June 30, 2019, for each of the fair value hierarchy levels are summarized below:

| | | Fai | ir Value M | easure | ements | | |

Valuation Techniques

As more fully discussed in Note 1, "Organization and Significant Accounting Policies," authoritative accounting guidance establishes a fair value hierarchy, which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Fair values of financial instruments represent the estimated amount to be received to sell an asset or paid to transfer or extinguish a liability among willing participants at the reporting date. Due to the uncertainty of expected cash flows resulting from financial instruments, the use of different assumptions and valuation methodologies could significantly affect the estimated fair value amounts. Accordingly, certain of the estimated fair values may not be indicative of the amounts for which the financial instruments could be exchanged in a current or future market transaction. The following represent a brief summary of the valuation techniques used by the bank for assets and liabilities measured at fair value:

Cash

For cash, the carrying amount is a reasonable estimate of fair value.

Investment Securities

Where quoted prices are available in an active market, available-for-sale securities would be classified as Level 1. If quoted prices are not available in an active market, the fair value of securities is estimated using observable inputs from quoted prices for similar securities received from pricing services or discounted cash flows. Generally, these securities would be classified as Level 2. Among other securities, this would include certain mortgage-backed securities and asset-backed securities. Where there is limited activity or less transparency around inputs to the valuation, the securities are classified as Level 3. Level 3 assets at June 30, 2019, included the bank's AMBS portfolio, which is valued by the bank using a model that incorporates underlying rates and current yield curves. Level 3 assets at June 30, 2019 also included select mortgage-backed securities.

To estimate the fair value of the majority of the investments held, including certain non-agency securities, the bank obtains prices from third-party pricing services.

Assets Held in Nonqualified Benefits Trusts

Assets held in trust funds related to deferred compensation and supplemental retirement plans would be classified within Level 1. The trust funds include investments that are actively traded and have quoted net asset values that are observable in the marketplace.

Derivatives

Exchange-traded derivatives valued using quoted prices would be classified within Level 1 of the valuation hierarchy. However, few classes of derivative contracts are listed on an exchange; thus, the majority of the derivative positions are valued using internally developed models that use as their basis readily observable market parameters and are classified within Level 2 of the valuation hierarchy. Such derivatives include interest rate caps and interest rate swaps.

The models used to determine the fair value of derivative assets and liabilities use an income approach based on observable market inputs, including the LIBOR and Overnight Index Swap curves and volatility assumptions about future interest rate movements.

Collateral Assets (Cash Collateral Posted with a Counterparty)

Derivative contracts are supported by bilateral collateral agreements with counterparties requiring the bank to post collateral in the event certain dollar thresholds of credit exposure are reached. The market value of cash collateral posted with a counterparty is the face value plus accrued interest, as that approximates fair value.

Letters of Credit

The fair value of letters of credit approximates the fees currently charged for similar agreements or the estimated cost to terminate or otherwise settle similar obligations.

Loans

Fair value is estimated by discounting the expected future cash flows using the banks' and/or the associations' current interest rates at which similar loans would be made to borrowers with similar credit risk. The discount rates are based on the banks' and/or the associations' current loan origination rates as well as management's estimates of credit risk. Management has no basis to determine whether the fair values presented would be indicative of the value negotiated in an actual sale and could be less.

For purposes of estimating fair value of accruing loans, the loan portfolio is segregated into pools of loans with homogeneous characteristics. Expected future cash flows, primarily based on contractual terms, and interest rates reflecting appropriate credit risk are separately determined for each individual pool.

The fair value of loans in nonaccrual status that are current as to principal and interest is estimated as described above, with appropriately higher interest rates which reflect the uncertainty of continued cash flows. For collateral-dependent impaired loans, it is assumed that collection will result only from the disposition of the underlying collateral.

The bank elected the fair value option for certain callable loans purchased on the secondary market at a significant premium. The fair value option provides an irrevocable option to elect fair value as an alternative measurement for selected financial assets. Fair value is used for both the initial and subsequent measurement of the designated instrument, with the changes in fair value recognized in net income. The fair value of securities is estimated using pricing models that utilize observable inputs, quoted prices for similar securities received from pricing services or discounted cash flows. Accordingly, these assets were classified within Level 2 at December 31, 2018.

Loans Evaluated for Impairment

For certain loans evaluated for impairment under accounting impairment guidance, the fair value is based upon the underlying collateral since the loans are collateral-dependent loans for which real estate is the collateral. The fair value measurement process uses independent appraisals and other market-based information, but in many cases it also requires significant input based on management's knowledge of and judgment about current market conditions, specific issues relating to the collateral and other matters. As a result, these fair value measurements fall within Level 3 of the hierarchy. When the value of the real estate, less estimated costs to sell, is less than the principal balance of the loan, a specific reserve is established.

Bonds and Notes

Systemwide debt securities are not all traded in the secondary market and those that are traded may not have readily available quoted market prices. Therefore, the fair value of the instruments is estimated by calculating the discounted value of the expected future cash flows. The discount rates used are based on the sum of quoted market yields for the Treasury yield curve and an estimated yield-spread relationship between System debt instruments and Treasury securities. We estimate an appropriate yield-spread taking into consideration selling group member (banks and securities dealers) yield indications, observed new government-sponsored enterprise debt security pricing and pricing levels in the related U.S. dollar interest rate swap market.

Other Property Owned

Other property owned is generally classified as Level 3 of the fair value hierarchy. The process for measuring the fair value of other property owned involves the use of independent appraisals or other market-based information. Costs to sell represent transaction costs and are not included as a component of the asset's fair value.

Uncertainty of Fair Value Measurements

For recurring fair value measurements categorized within Level 3 of the fair value hierarchy, the significant unobservable inputs used in the fair value measurement of the mortgage-backed securities was vendor pricing.

Quoted market prices may not be available for the instruments presented below. Accordingly, fair values are based on internal models that consider judgments regarding anticipated cash flows, future expected loss experience, current economic conditions, risk characteristics of various financial instruments and other factors. Significant increases (decreases) in any of those inputs in isolation would have resulted in a significantly lower (higher) fair value measurement. Generally, a change in the assumption used for the probability of default would have been accompanied by a directionally similar change in the assumption used for the loss severity and a directionally opposite change in the assumption used for prepayment rates. These estimates involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Information About Recurring and Nonrecurring Level 3 Fair Value Measurements

| | Valuation Technique(s) | Unobservable Input | Range of Inputs / Weighted Average |
|----------------------------|------------------------|--------------------|---------------------------------------|
| Mortgage-backed securities | Vendor priced | - | - |
| Other investments | Discounted cash flow | Prepayment rates | 2.3% - 38.0% / |

With regard to impaired loans and OPO, it is not practicable to provide specific information on inputs as each collateral property is unique. System institutions utilize appraisals to value these loans and OPO and take into account unobservable inputs such as income and expense, comparable sales, replacement cost and comparability adjustments.

| | Valuation Technique(s) | Input |
|--|---------------------------------------|---|
| Federal funds sold | Carrying value | Par/principal |

| Interest rate caps | Discounted cash flow | Appropriate interest rate yield curve Annualized volatility |
| Interest rate swaps | Discounted cash flow | Benchmark yield curve Counterparty credit risk Volatility |

Information about Recurring and Nonrecurring Level 2 Fair Value Measurements

NOTE 7 — ASSET/LIABILITY OFFSETTING

Derivative transactions with swap dealers include bilateral collateral and netting agreements that require the net settlement of covered contracts. Notwithstanding collateral and netting provisions, our derivative assets and liabilities are not offset in the accompanying condensed balance sheets. The amount of collateral received or pledged is calculated on a net basis, by counterparty.

The following table summarizes derivative assets and liabilities and amounts of collateral exchanged pursuant to our agreements.

| | Gros | s Amounts of | Amounts Not Condensed B | t Offset in the Salance Sheet | | | |
|---|------|---|--------------------------------|---|---|-----|--------|
| June 30, 2019 | P | ets/Liabilities resented in e Condensed lance Sheets | Cash Collateral Pledged | Investment Securities Received/Pledged as Collateral | | Net | Amount |
| Assets: Interest rate swaps and other derivatives Liabilities: | \$ | 2,679 | \$ - | \$ - | - | \$ | 2,679 |
| Interest rate swaps and other derivatives | \$ | 53,563 | \$ (17,260) | \$ - | _ | \$ | 36,303 |

At December 31, 2018, we had no cash collateral or investment securities received or pledged as part of the agreements.

NOTE 8 — DERIVATIVE FINANCIAL INSTRUMENTS AND HEDGING ACTIVITIES

The bank maintains an overall interest rate risk management strategy that incorporates the use of derivative instruments to minimize significant unplanned fluctuations in earnings that are caused by interest rate volatility. The bank's goal is to manage interest rate sensitivity by modifying the repricing or maturity characteristics of certain balance sheet assets and liabilities so that the net interest margin is not adversely affected by movements in interest rates. The bank considers the strategic use of derivatives to be a prudent method of managing interest rate sensitivity, as it prevents earnings from being exposed to undue risk posed by changes in interest rates.

The bank may enter into derivative transactions to lower funding costs, diversify sources of funding, alter interest rate exposures arising from mismatches between assets and liabilities, or better manage liquidity. Under interest rate swap arrangements, the bank agrees with other parties to exchange, at specified

intervals, payment streams calculated on a specified notional amount, with at least one stream based on a specified floating-rate index. The bank may purchase interest rate options, such as caps, in order to reduce the impact of rising interest rates on its floating-rate debt.

At June 30, 2019, the bank held interest rate caps with a notional amount of \$195.0 million and a net fair value asset of \$282, and pay fixed interest rate swaps with a notional amount of \$825.0 million and a net fair value liability of \$51,166. The primary types of derivative instruments used and the amount of activity (notional amounts derivatives) during the six months ended June 30, 2019, are summarized in the following table:

| | Pa | ay-Fixed | Int | erest Rate | |
|----------------------------|----|----------|-----|------------|-----------------|
| | | Swaps | | Caps | Total |
| Balance at January 1, 2019 | \$ | 825,000 | \$ | 195,000 | \$ 1,020,000 |
| Additions | | - | | - | - |
| Maturities/Amortizations | | - | | - | - |
| Balance at June 30, 2019 | \$ | 825,000 | \$ | 195,000 | \$ 1,020,000 |

To minimize the risk of credit losses, the bank deals with counterparties that have an investment grade or better credit rating from a major rating agency, and also monitors the credit standing and levels of exposure to individual counterparties. In addition, substantially all derivative contracts are supported by bilateral collateral agreements with counterparties requiring the posting of collateral in the event certain dollar thresholds of exposure of one party to another are reached, which thresholds may vary, depending on the counterparty's credit rating. The bank does not anticipate nonperformance by any of these counterparties. However, derivative contracts are reflected in the financial statements on a gross basis regardless of the netting agreement. At June 30, 2019, and December 31, 2018, counterparties' credit exposure to the bank was \$33.6 million and \$5.4 million, respectively. At June 30, 2019, the bank had posted \$17.3 million of cash as collateral, and no counterparty has been required to post collateral. At December 31, 2018, the bank had posted no cash or securities as collateral, nor had any counterparty been required to post collateral.

Derivative – Counterparty Exposure

The following table represents the credit ratings of counterparties the bank has credit exposure with at June 30, 2019:

| | Remaining | g Yea | ars to Matu | rity | (1) | | | | | E | xposure |
|-----------------------|----------------|-------|-------------|------|----------|----|----------|----|------------|----|-----------|
| | Up to Five | Μ | ore Than | | | | | (| Collateral | | Net of |
| | Years | Fi | ive Years | | Total | F | xposure | | Posted | С | ollateral |
| Moody's Credit Rating | | | | | | | | | | | |
| A1 | \$ - | \$ | 19 | \$ | 19 | \$ | 19 | \$ | - | \$ | 19 |
| Aa2 | 1,742 | | (3,378) | | (1,636) | | (1,636) | | - | | (1,636) |
| Aa2 | - | | (35,074) | | (35,074) | | (35,074) | | (16,990) | | (18,084) |
| Aa2 | - | | 221 | | 221 | | 221 | | - | | 221 |
| Aa3 | 658 | | (15,072) | | (14,414) | | (14,414) | | (270) | | (14,144) |
| Total | \$ 2,400 | \$ | (53,284) | \$ | (50,884) | \$ | (50,884) | \$ | (17,260) | \$ | (33,624) |

(1) Represents gain or loss positions on derivative instruments with individual counterparties. Net gains or losses represent the exposure to credit loss estimated by calculating the cost, on a present value basis, to replace all outstanding derivative contracts within a maturity category. Within each maturity category, contracts in a loss position are netted against contracts in a gain position with the same counterparty.

Cash Flow Hedges

The bank's derivative instruments at June 30, 2019 and December 31, 2018, which are designated and qualify as a cash flow hedge, all meet the standards for accounting treatment that presume full effectiveness. Thus, the effective portion of the gain or loss on the derivative is reported as a component of other comprehensive income.

| | Balance Sheet Location | Fair Va June 30, | | Fair Value December 31, 2018 | Balance Sheet Location | | r Value 30, 2019 | | Value r 31, 2018 |
|--------------------|---------------------------|-----------------------------------|-------|---------------------------------|---------------------------|----|------------------------------|----|---------------------|
| Interest rate caps | Other assets | \$ | 282 | \$ 448 | Other liabilities | \$ | - | \$ | - |
| Pay fixed swaps | Other assets | | 2,396 | 10,253 | Other liabilities | | (53,562) |) | (16,143) |
| | Derivati | ognized in OCI ives at June 30 | , | | Am | А | uin (Loss) Re OCI at June | | |
| _ | 2019 | | 2018 | | | | 2019 | | 2018 |
| Interest rate caps | \$ | 165 \$ | 152 | 2 Interest expense | | \$ | (129) | 5 | 6 (67) |
| Pay fixed swaps | 45,0 | 073 | 7,313 | 3 Interest income | | | 230 | | 263 |

In the next 12 months, we expect to reclassify to earnings losses of \$688 recorded in AOCI as of June 30, 2019. These amounts will offset the cash flows associated with the hedged forecasted transactions.

NOTE 9 — CAPITAL

Effective January 1, 2017, the regulatory capital requirements for System banks and associations were modified. The new regulations replaced existing core surplus and total surplus ratios with common equity tier 1, tier 1 capital and total capital risk-based capital ratios. The new regulations also added a tier 1 leverage ratio and an unallocated retained earnings equivalents (UREE) leverage ratio. The permanent capital ratio continues to remain in effect.

| | | | Total | | |
|----------------------------|------------|--------------|------------|---------------|-------------------|
| | Regulatory | Conservation | Regulatory | As of | As of |
| Risk-adjusted | Minimums | Buffers* | Minimums | June 30, 2019 | December 31, 2018 |
| Common equity tier 1 ratio | 4.5% | 2.5% * | 7.0% | 9.61% | 9.92% |
| Tier 1 capital ratio | 6.0 | 2.5 * | 8.5 | 15.88 | 16.29 |
| Total capital ratio | 8.0 | 2.5 * | 10.5 | 16.01 | 16.42 |
| Permanent capital ratio | 7.0 | 0.0 | 7.0 | 15.90 | 16.31 |
| Non-risk-adjusted | | | | | |
| Tier 1 leverage ratio | 4.0 | 1.0 | 5.0 | 7.13 | 7.39 |
| UREE leverage ratio | 1.5 | 0.0 | 1.5 | 2.86 | 3.08 |

The bank's regulatory capital ratios were as follows:

*The 2.5 percent capital conservation buffer for the risk-adjusted ratios will be phased in over a three- year period ending on December 31, 2019.

Risk-adjusted assets have been defined by FCA regulations as the statement of condition assets and offbalance-sheet commitments adjusted by various percentages, depending on the level of risk inherent in the various types of assets. The primary changes which generally have the impact of increasing riskadjusted assets (decreasing risk-based regulatory capital ratios) were as follows:

- Inclusion of off-balance-sheet commitments less than 14 months;
- Increased risk-weighting of most loans 90 days past due or in nonaccrual status; and,
- Inclusion of unfunded commitments for direct notes from district associations.

The ratios are based on a three-month average daily balance in accordance with FCA regulations and are calculated as follows:

- Common equity tier 1 ratio is statutory minimum purchased borrower stock, other required borrower stock held for a minimum of 7 years, allocated equities held for a minimum of 7 years or not subject to revolvement, unallocated retained earnings, paid-in capital, less certain regulatory required deductions including the amount of allocated investments in other System institutions, and the amount of purchased investments in other System institutions under the corresponding deduction approach, divided by average risk-adjusted assets.
- Tier 1 capital ratio is common equity tier 1 plus noncumulative perpetual preferred stock, divided by average risk-adjusted assets.
- Total capital is tier 1 capital plus other required borrower stock held for a minimum of 5 years, allocated equities held for a minimum of 5 years, subordinated debt and limited-life preferred stock greater than 5 years to maturity at issuance subject to certain limitations, allowance and reserve for credit losses under certain limitations less certain investments in other System institutions under the corresponding deduction approach, divided by average risk-adjusted assets.
- Permanent capital ratio (PCR) is all at-risk borrower stock, any allocated excess stock, unallocated retained earnings, paid-in capital, subordinated debt and preferred stock subject to certain limitations, less certain allocated and purchased investments in other System institutions, divided by PCR risk-adjusted assets.
- Tier 1 leverage ratio is tier 1 capital, including regulatory deductions, divided by average assets less regulatory deductions subject to tier 1 capital.
- UREE leverage ratio is unallocated retained earnings, paid-in capital, allocated surplus not subject to revolvement less certain regulatory required deductions including the amount of allocated investments in other System institutions divided by average assets less regulatory deductions subject to tier 1 capital.

If the capital ratios fall below the minimum regulatory requirements, including the capital conservation and leverage buffer amounts, capital distributions (equity redemptions, dividends and patronage) and discretionary bonus payments to senior officers are restricted or prohibited without prior FCA approval.

| (dollars in thousands) | | | ier 1 capital ratio | Total capital ratio | | | Permanent capital ratio | |

NOTE 10 — EMPLOYEE BENEFIT PLANS

In addition to pension benefits, the bank provides certain health care benefits to qualifying retired employees (other postretirement benefits). These benefits are not characterized as multiemployer and, consequently, the liability for these benefits is included in other liabilities. Bank employees hired after January 1, 2004, will be eligible for retiree medical benefits for themselves and their spouses at their expense but will be responsible for 100 percent of the related premiums. The following table summarizes

the components of net periodic benefit costs for the bank's other postretirement benefit costs for the six months ended June 30:

| | Other Postretirement | | | | |
|------------------------------------|----------------------|----------|------|------|--|
| | | Benefits | | | |
| | 2 | 2019 | 2018 | | |
| Service Cost | \$ | 111 | \$ | 137 | |
| Interest Cost | | 258 | | 247 | |
| Amortization of prior service cost | | (39) | | (70) | |
| Amortization of net actuarial loss | | - | | 46 | |
| | \$ | 330 | \$ | 360 | |

The components of net periodic benefit cost other than the service cost component are included in the line item "other components of net periodic postretirement benefit cost" in the income statement.

The structure of the district's defined benefit pension plan is characterized as multiemployer, since the assets, liabilities and cost of the plan are not segregated or separately accounted for by participating employers (bank and associations).

NOTE 11 — ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

Accumulated other comprehensive loss (AOCL) includes the accumulated balance of certain gains, losses or costs for which values are included in assets or liabilities on the balance sheets, but which have not yet been recognized in earnings. For the bank, these elements include unrealized gains or losses on the bank's available-for-sale investment portfolio, amortization of retirement benefit elements and changes in the value of cash flow derivative instruments.

The following table summarizes the changes in the balance of the components of AOCL for the six months ended June 30, 2019:

| | | Unrealized | Retirement | Cash Flow | |
|--|-------------|----------------|------------|-------------|--|
| | | (Loss) Gain on | Benefit | Derivative | |
| | Total | Securities | Plans | Instruments | |
| Balance, January 1, 2019 | \$ (81,693) | \$ (74,541) | \$ (27) | \$ (7,125) | |

NOTE 12 — SUBSEQUENT EVENTS

The bank has evaluated subsequent events through August 9, 2019, which is the date the financial statements were issued. There are no other significant subsequent events requiring disclosure as of August 9, 2019.

NOTE 13 — COMBINED DISTRICTWIDE FINANCIAL STATEMENTS

The accompanying financial statements exclude financial information of the bank's affiliated associations. The bank and its affiliated associations are collectively referred to as the "Texas District." The bank separately publishes certain unaudited combined financial information of the Texas District, including a condensed statement of condition and statement of income, which can be found on the bank's website at *www.farmcreditbank.com*. Such information is not incorporated by reference to, and should not be considered part of, this quarterly report.

The following disclosures contain regulatory disclosures as required under Farm Credit Administration (FCA) Regulation 628.63 for risk-adjusted ratios: common equity tier 1, tier 1 capital and total capital. Refer to Note 9 of the accompanying financial statements for information regarding the statutorily required permanent capital ratio. As required, these disclosures are made available for at least three years or such shorter period beginning on January 1, 2017, and can be accessed at Farm Credit Bank of Texas' website at *www.farmcreditbank.com*.

FCA Regulation Section 628.62(a) requires each System bank to provide timely public disclosures at the end of each calendar quarter. Qualitative disclosures that typically do not change each quarter may be disclosed annually after the end of the fourth calendar quarter, provided that any significant changes are disclosed in the interim. FCA provided additional guidance that System banks must provide their first qualitative disclosures as of March 31, 2017, and again at the end of December 31, 2017, provided that any significant changes be disclosed in the interim. After that time, System banks may provide qualitative disclosures annually, as long as any significant changes are disclosed in the interim.

No other significant qualitative changes occurred for the second quarter of 2019 to be included within this disclosure as compared to the disclosures as of December 31, 2018.

Scope of Application

The disclosures herein relate to the Farm Credit Bank of Texas (FCBT or bank). The bank and its related associations are collectively referred to as the Farm Credit Bank of Texas and affiliated associations (Texas District). The bank has no subsidiaries; therefore the financial statements are only those of the bank and are not consolidated with any other entity.

Capital Structure

The following table provides a summary of the bank's capital structure at June 30, 2019:

| (dollars in thousands) | | ree-Month erage Daily Balance |
|--|----|-------------------------------------|
| Common equity tier 1 capital (CET1) | | |
| Common cooperative equities: | | |
| Purchased other required stock \geq 7 years | \$ | 280,529 |
| Allocated stock \geq 7 years | | 36,042 |
| Other required member purchased stock | | - |
| Allocated equities: | | |
| Qualified allocated equities subject to retirement | | 45,673 |
| Nonqualified allocated equities subject to retirement | | - |
| Nonqualified allocated equities not subject to retirement | | - |
| Unallocated retained earnings | | 859,960 |
| Paid-in capital | | - |
| Regulatory adjustments and deductions made to CET1 | | (149,850) |
| Total CET1 | \$ | 1,072,354 |
| Tier 1 capital | | |
| Noncumulative perpetual preferred stock | \$ | 700,000 |
| Regulatory adjustments and deductions made to tier 1 capital | | - |
| Total additional tier 1 capital | | 700,000 |
| Total tier 1 capital | \$ | 1,772,354 |
| Total capital | | |
| Common cooperative equities not included in CET1 | \$ | - |
| Tier 2 capital elements (subordinated debt, allowance | | |
| for loan losses) | | 14,139 |
| Regulatory adjustments and deductions made to total capital | | - |
| Total tier 2 capital | | 14,139 |
| Total capital | \$ | 1,786,493 |

There were no common cooperative equities not included in Tier 1 capital.

Capital Adequacy and Capital Buffers

The bank's risk-adjusted regulatory capital ratios are calculated by dividing the relevant total capital elements by risk-weighted assets. The following table provides the bank's risk-weighted assets at June 30, 2019:

| (dollars in thousands) | hree-Month verage Daily Balance |
|---|---|
| On-Balance Sheet Assets: | |
| Exposures to sovereign entities | \$ - |
| Exposures to supranational entities and Multilateral Development Banks | - |
| Exposures to government-sponsored entities (direct notes to associations) | 2,456,187 |
| Exposures to depository institutions, foreign banks and credit unions | 1,308 |
| Exposures to public sector entities | - |
| Corporate exposures, including borrower loans and exposures to other financing institutions | 6,212,530 |
| Residential mortgage exposures | - |
| Past due and nonaccrual exposures | 27,653 |
| Securitization exposures | 74,495 |
| Exposures to other assets | 932,659 |
| Total Risk-Weighted Assets, On-Balance Sheet | 9,704,832 |
| Off-Balance Sheet: Letters of Credit | 56,703 |
| Commitments | 1,396,524 |
| Over-the-Counter Derivatives | 1,526 |
| Unsettled transactions | 116 |
| Cleared transactions | - |
| All other off-balance sheet exposures | 2,115 |
| Total Risk-Weighted Assets, Off-Balance Sheet | 1,456,984 |
| Total Risk-Weighted Assets before Adjustments | 11,161,816 |
| Additions: | |
| Intra-System Equity Investments | 149,850 |
| Deductions: | |
| Regulatory Capital Deductions | (149,850) |
| Total Standardized Risk-Weighted Assets | \$ 11,161,816 |

Capital Conservation and Leverage Buffers

As of June 30, 2019, the bank was well-capitalized and exceeded all capital requirements to which it was subject, including applicable capital buffers. The bank's capital conservation buffer is the lowest of the calculated buffer listed in the table below at 5.11 percent. The bank's leverage buffer of 3.13 percent is equal to the tier 1 leverage ratio minus the minimum tier 1 leverage ratio requirement. Because the bank's conservation and leverage buffers exceed the minimum buffer requirements of 2.5 percent and 1 percent, respectively, the bank currently has no limitations on its distributions and discretionary bonus payments. The aggregate amount of eligible retained income was \$22,813 as of June 30, 2019.

| | Regulatory Minimums | Required Buffers | Ratios as of June 30, 2019 | Calculated Buffers |
|-------------------------------------|------------------------|---------------------|-------------------------------|-----------------------|
| Common equity tier 1 capital ratio* | 4.5% | 2.5% | 9.61% | 5.11% |
| Tier 1 capital ratio* | 6.0% | 2.5% | 15.88% | 9.88% |
| Total capital ratio* | 8.0% | 2.5% | 16.01% | 8.01% |
| Capital conservation buffer | | | | 5.11% |
| Tier 1 leverage ratio | 4.0% | 1.0% | 7.13% | 3.13% |
| Leverage buffer | | | | 3.13% |

*The capital conservation buffer over risk-adjusted ratio minimums will be phased in over 3 years under the FCA revised capital requirements, up to 2.5 percent beginning in 2020.

Credit Risk

System entities have specific lending authorities within their chartered territories. The bank is chartered to serve its associations in Texas, Alabama, Mississippi, Louisiana and most of New Mexico. Our chartered territory is referred to as the district. FCBT serves its chartered territory by lending to the district's Federal Land Credit Association (FLCA) and Agricultural Credit Associations (ACAs). The allowance for loan losses is determined based on a periodic evaluation of the loan portfolio, which identifies loans that may be impaired based on characteristics such as probability of default (PD) and loss given default (LGD). Allowance needs by geographic region are only considered in circumstances that may not otherwise be reflected in the PD and LGD such as flooding or drought. There was no allowance attributed to a geographic area as of June 30, 2019.

Refer to the Risk-Adjusted Asset table on page 52 for the bank's total and average loans, investment securities, off-balance-sheet commitments and OTC derivatives. The following table illustrates the bank's total exposure (including commitments) by loan type as of June 30, 2019.

| | T | otal Exposure |
|--|----|---------------|
| Direct notes receivable from district associations | \$ | 16,362,207 |
| Real estate mortgage | | 769,601 |
| Production and intermediate term | | 1,113,398 |
| Agribusiness | | |
| Loans to cooperatives | | 739,938 |
| Processing and marketing | | 3,902,364 |
| Farm-related business | | 162,046 |
| Communications | | 506,475 |
| Energy (rural utilities) | | 1,878,434 |
| Water and waste disposal | | 170,352 |
| Mission-related | | 16,198 |
| Leases | | 12,857 |
| Loans to other financing institutions | | 76,000 |
| Total | \$ | 25,709,870 |

The following table provides an overview of the remaining contractual maturity of the bank's credit risk portfolio categorized by exposure at June 30, 2019. The remaining contractual maturity for the bank's direct notes from associations is included in the loans line item based on the contractual terms of the underlying association retail loans. Unfunded commitments for direct notes from associations reflects the aggregate remaining amount that the associations can borrow from the bank and is included in the table within one year or less column within the unfunded commitments line item.

| (dollars in thousands) | Due in one year or less | Due after one /ear through five years | Due after five years | Total |
|-------------------------------|-------------------------------|---|-------------------------|------------------|
| Loans | \$ 4,573,970 | \$ 8,764,962 | \$ 5,607,647 | \$ 18,946,579 |
| Off-Balance-Sheet Commitments | | | | |
| Financial letters of credit | 38,936 | 29,199 | - | 68,135 |
| Performance letters of credit | 5,277 | 2,831 | - | 8,108 |
| Commercial letters of credit | 1,525 | 1,312 | - | 2,837 |
| Unfunded commitments | 4,617,385 | 2,000,150 | 66,676 | 6,684,211 |
| Investments | 437,207 | 496,398 | 4,579,393 | 5,512,998 |
| Derivatives (notional) | - | 280,000 | 740,000 | 1,020,000 |
| Total | \$ 9,674,300 | \$ 11,574,852 | \$ 10,993,716 | \$ 32,242,868 |

The following table illustrates the bank's total exposure (including commitments) by geographic distribution based on the headquarters location of the underlying retail loans for the bank and affiliated associations as of June 30, 2019:

| State | Percentage |
|------------------|------------|
| Texas | 49 % |
| Mississippi | 6 |
| Alabama | 6 |
| Louisiana | 3 |
| California | 3 |
| All other states | 33 |
| | 100 % |

Refer to Note 3 for amounts of impaired loans with or with no related allowance, loans in nonaccrual status and greater than 90 days past due, loans past due greater than 90 days and still accruing, the allowance at the end of each reporting period, charge-offs during the period, and changes in components of our allowance for credit losses.

Counterparty Credit Risk and Credit Risk Mitigation

The following table provides the total exposure covered by guarantees/credit derivatives for each separately disclosed credit risk portfolio and the risk-weighted asset amount associated with that exposure. The bank did not hold any purchased credit derivatives for its own credit portfolio, nor did it hold eligible financial collateral for its loan, investment and derivative portfolios at June 30, 2019.

| Government Guaranteed | T | hree-Month | Risk | Risk-Weigh | ted |
|-----------------------------------|-----|---------------|-----------|------------|-----|
| Asset Type (dollars in thousands) | Ave | erage Balance | Weighting | Amount | |
| Investments | \$ | 3,348,573 | 0% | \$ | - |
| Loans | | 2,308 | 0% | | - |
| Total | \$ | 3,350,881 | | \$ | - |

The table below shows derivatives by underlying exposure type, segregated between interest rate caps and pay fixed swaps, both of which are traded in over-the-counter markets as of June 30, 2019.

| | Notional | ss Positive ir Values |
|--------------------------|-----------------|------------------------------|
| Interest rate caps | \$ 195,000 | \$ 282 |
| Pay fixed swaps | 825,000 | 2,396 |
| Total Derivatives | \$ 1,020,000 | \$ 2,678 |

Securitization

The bank currently only participates in credit-related securitizations as investors through the purchase of asset-backed securities (ABS) as included in its investment portfolio. The bank also holds securitization exposures through the purchase of U.S. government and agency guaranteed securities. The bank has not transferred any exposures that it has originated or purchased from a third party in connection with a securitization of assets as of June 30, 2019, nor does it have any outstanding exposures that it intends to be securitized as of June 30, 2019. During the three months ended June 30, 2019, three investment securities were sold for total proceeds of \$272.8 million, resulting in gains of \$7.5 million recognized in noninterest income. As of June 30, 2019, the bank did not retain any credit-related re-securitization exposures.

Below is an overview of our purchased securitization exposures held as of June 30, 2019, by exposure type and categorized by risk-weighting band and risk-based capital approach. As of June 30, 2019, the bank did not hold any off-balance sheet securitization exposures nor were any securitization exposures deducted from capital.

| | | | Exposure | |
|-------------------------------|---------------------------|--------|---------------------|--------------|
| | Risk-Based Capital | | Amount | |
| Description of Securitization | Approach | (dolla | rs in thousands) Ri | isk Weighted |
| Agency MBS: | | | | |
| GNMA | Standardized Risk Weight | \$ | 2,407,300 | 0% |
| FNMA and FHLMC | Standardized Risk Weight | | 2,038,667 | 20% |
| Total Agency MBS | | \$ | 4,445,967 | |
| Asset-backed securities: | | | | |
| Small Business Administration | Standardized Risk Weight | \$ | 69,479 | 0% |
| Asset-backed securities | Gross-up | | 51,950 | 20%-100% |
| Asset-backed securities | Gross-up | | 13,182 | 126%-150% |
| | | | 65,132 | 104% |
| Total Asset-backed securities | | \$ | 134,611 | |

Equities

The bank is a limited partner in certain Rural Business Investment Companies (RBICs) for various relationship and strategic reasons. These RBICs facilitate equity and debt investments in agriculture-related businesses that create growth and job opportunities in rural America. These investments are accounted for under the equity method, as the bank is considered to have significant influence. These investments are not publicly traded, and the book value approximates fair value. The bank had no unrealized gains or losses not recognized either on the balance sheet or through earnings.

| | | | | Life-to-Date |
|------------------------|----|------------|----|----------------------|
| As of June 30, 2019 | Di | sclosed in | 1 | Losses Recognized in |
| (dollars in thousands) | Ot | her Assets | | Retained Earnings* |
| RBICs | \$ | 14,742 | \$ | (3,302) |

*Retained earnings is included in common equity tier 1 and total capital ratios

Interest Rate Risk

The following tables set forth the bank's projected annual net interest income and market value of equity for interest rate movements as prescribed by policy as of June 30, 2019, based on the bank's interest-earning assets and interest-bearing liabilities at June 30, 2019:

| Basis points: | -105* | -100 | +100 | +200 |
|----------------------------------|-------|-------|---------|----------|
| Change in net interest income | 9.58% | 7.90% | 3.48% | 5.36% |
| Change in market value of equity | 0.57% | 0.66% | (4.10%) | (11.88%) |

*When the 3-month Treasury bill is below 4.00 percent, the shock-down 200 scenario is replaced with a shock-down equal to half of the 3-month Treasury bill. The bank measures interest rate risk on a quarterly basis.

For interest rate risk management, the \$700.0 million noncumulative perpetual preferred stock is included in liabilities.
