(Unaudited)

### INTRODUCTION AND TEXAS FARM CREDIT DISTRICT OVERVIEW

The Farm Credit Bank of Texas (the Bank) and its affiliated associations, collectively referred to as the Texas Farm Credit District (the Texas District), are part of the Farm Credit System (the System). The System is a federally chartered network of borrower-owned lending institutions comprised of cooperatives and related service organizations. The Texas District's chartered territory includes the states of Texas, Alabama, Mississippi, Louisiana and most of New Mexico. As of December 31, 2023, the Bank served one Federal Land Credit Association (FLCA) and 12 Agricultural Credit Associations (ACAs) (collectively referred to as Associations). The Bank also serves certain Other Financing Institutions (OFIs), which are not part of the System.

The U.S. Congress authorized the creation of the first System institutions in 1916 to provide support for the agricultural sector because of its significance to the well-being of the U.S. economy and the U.S. consumer. The mission of the System is to provide sound and dependable credit to American farmers, ranchers, producers or harvesters of aquatic products, their cooperatives, and certain farm-related businesses. The System does this by making appropriately structured loans to qualified individuals and businesses at competitive rates and providing financial services and advice to those persons and businesses. The System is a cooperative structure. Cooperatives are organizations that are owned and controlled by their members who use the cooperatives' products or services.

Farm Credit's funds are raised by the Federal Farm Credit Banks Funding Corporation (the Funding Corporation) and insured by the Farm Credit System Insurance Corporation (FCSIC). On behalf of the four System banks, the Funding Corporation issues a variety of Federal Farm Credit Banks Combined Systemwide Debt Securities with broad ranges of maturities and structures. Each System bank has exposure to systemwide credit risk because it is jointly and severally liable for all debt issued by the Funding Corporation. The associations in each district receive funding from their System bank and, in turn, provide credit to their borrower-shareholders. The associations have specific lending authority within their chartered territories and are subject to examination and regulation by an independent federal agency, the Farm Credit Administration.

The following commentary reviews the combined financial statements of condition and results of operations of the Texas District for the years ended December 31, 2023, 2022 and 2021.

#### **COMBINED FINANCIAL HIGHLIGHTS**

| (in thousands)   | De | cember 31, 2023 | De | cember 31, 2022 | De | ecember 31, 2021 |
|--|----|-----------------|----|-----------------|----|------------------|

# MANAGEMENT'S DISCUSSION AND ANALYSIS

(dollars in thousands, except as noted)

## CONDITIONS IN THE TEXAS DISTRICT

The Texas District continues to fulfill its mission to support agriculture and rural communities by providing access to reliable and consistent credit in the midst of financial and macroeconomic volatility driven by factors such as elevated interest rates and persistently high inflation. Despite the challenging operating environment, credit quality in the Texas District has remained strong. Volatility in risk ratings is likely to remain a concern in the near future due to the persistence of inflationary pressure, the relatively high cost of debt and an underlying recession risk.

The Consumer Price Index for All Urban Consumers increased by 3.1% for the 12-month period ending January 2024, above the long-term target of approximately 2.0%. However, recent inflation rates represent significant declines from the four-decade high of 9.1% reached in June 2022. Since July 2023, the Federal Open Market Committee (FOMC) has maintained the target federal funds rate within the 5.25 – 5.50% range. At the January 2024 FOMC meeting, the Committee stated that it does not expect it will be appropriate to reduce the target federal funds rate until it has gained greater confidence that inflation is moving sustainably toward 2.0%. Participants indicated that the policy rate was likely at or near its peak for this tightening cycle and that cuts in the federal funds rate were probable during 2024. Participants were resolute in their commitment to bring inflation down to the 2.0% long-run objective while achieving maximum employment.

On January 25, 2024, the U.S. Bureau of Economic Analysis (BEA) released an advance estimate of real gross domestic product (GDP) for the fourth quarter of 2023. U.S. real GDP increased at an annual rate of 3.3% during the fourth quarter of 2023, down from 4.9% during the previous quarter but up from 2.6% during the

same period a year ago. The increase in real GDP during the fourth quarter primarily reflected higher levels of consumer spending, exports, and state and local government spending, among other categories. According to the International Monetary Fund's latest World Economic Outlook released in January 2024, U.S. real GDP growth is estimated to be 2.1% in 2024 and 1.7% in 2025, revised up from its October edition. Within the Texas District, the BEA estimated that third quarter 2023 annualized real GDP growth rates ranged from a low of 0.8% in Mississippi to a high of 7.7% in Texas. Retail trade was the leading contributor to growth in 39 states, including Texas, the state with the second-largest increase in real GDP during the third quarter of 2023. Nondurable-goods manufacturing was the leading contributor to growth in three states, including Louisiana, the state with the fifth-largest increase in real GDP.

The U.S. Bureau of Labor Statistics (BLS) indicated that the U.S. unemployment rate remained steady monthover-month (MOM) at 3.7% in January 2024, down from 3.8% in October but up from 3.4% during the same period a year ago. The December state unemployment rates in the Texas District ranged from a low of 2.6% in Alabama to a high of 4.0% in New Mexico and Texas.

The West Texas Intermediate (WTI) crude oil futures price (front-month) decreased during the fourth quarter of 2023 to an average of nearly \$79 per barrel from an average of about \$82 per barrel in the third quarter. The front-month WTI price similarly decreased by approximately 5.0% compared to a year ago. In the February 2024 edition of the Short-Term Energy Outlook, the U.S. Energy Information Administration estimated that the monthly average WTI spot price would be about \$78 per barrel in 2024 and \$75 per barrel in 2025. The WTI spot price closed at about \$74 per barrel in January 2024.

On February 7, 2024, the U.S. Department of Agriculture (USDA) released its 2024 farm income forecast and updated prior-year estimates. After increasing by 30.3% year-over-year (YOY) in 2022 and reaching a record high, nominal net farm income is estimated to have decreased YOY by 16.0% to \$155.9 billion in 2023 and is forecasted to continue declining by approximately 25.5% in 2024. Total production expenses are estimated to have increased by 2.3% YOY in 2023 to approximately \$438.3 billion and are forecasted to continue rising by 3.8% in 2024. Direct government farm payments are estimated at \$12.2 billion in 2023, down 21.8% from 2022. Additionally, direct government payments are forecasted to decrease by 15.9% in 2024. Interest expenses and livestock/poultry purchases are estimated to have seen the largest increases in 2023, while spending on fertilizer/lime/soil conditioners/fuels/oils, and feed are estimated to have declined YOY. Livestock/poultry purchases and labor expenses are forecasted to exhibit the largest increases in 2024. Farm sector assets are estimated to have increased by 6.6% in 2023 and are forecasted to continue rising by 4.7% in 2024, following expected increases in the value of farm real estate assets. Similarly, equity is forecasted to have increased by 6.8% in 2023 and to continue improving by 4.7% in 2024. The U.S. farm sector debt-to-asset ratio is estimated to have improved YOY from 12.9% in 2022 to 12.7% in 2023 but is forecasted to deteriorate slightly to 12.8% in 2024.

According to USDA's February 2024 World Agricultural Supply and Demand Estimates (WASDE) report, average farm prices for corn, wheat, and soybeans are estimated to have increased by approximately 9.0%, 15.7%, and 6.8%, respectively, YOY during the 2022/23 marketing year, while the average farm price for upland cotton is estimated to have declined by 7.2%. The prices of these crops are projected to decrease during the 2023/24 season from a range of nearly 9.2% (cotton) to 26.6% (corn). Barrow and gilt, broiler, and turkey prices are estimated to have decreased by 17.7%, 11.5%, and 9.3%, respectively, YOY in 2023, while steer prices are estimated to have risen by an average of 21.6%. Relatively small price increases (i.e., less than 2.6%) are projected for steers, barrows and gilts, and broilers in 2024, while turkey prices are projected to decline YOY by nearly 24.0%. USDA estimates that all-milk prices declined by 19.2% from an average of about \$25.3 per hundredweight (/cwt.) in 2022 to an estimated average of \$20.5/cwt. in 2023. All-milk prices are projected to increase in 2024 by about 2.3%.

Front-month random length lumber futures prices increased over the fourth quarter of 2023 by approximately 14.2%, leading to a YOY increase of 16.8% in 2023. Lumber futures prices were volatile in 2023, and this volatility will likely persist in 2024 as elevated interest rates continue to affect

construction-related demand. Front-month lumber prices decreased by about 1.9% MOM in January 2024 and were down by 12.9% YOY.

Lack of adequate precipitation and soil moisture was a concern for agricultural producers across several regions of the country during 2023. The year was among the driest and hottest on record for many cities. In 2024, the National Weather Service indicates that a strong El Niño is expected to continue through the rest of winter into early spring. The seasonal drought outlook from January through March 2024 indicates that an active southern storm track associated with El Niño conditions favors drought improvement and removal for parts of eastern Texas. Despite the likelihood that the southern region will see at least some precipitation associated with El Niño, these events are likely to be fast-moving. Drought persistence is expected for much of the Southern Plains.

Agricultural producers and processors were negatively impacted by several factors during 2023, including volatile commodity prices, high input costs, export market disruptions, geopolitical challenges, and adverse weather conditions. The Texas District's loan portfolio is well-supported by industry diversification and conservative advance rates. Additionally, a high percentage of the Texas District's borrowers primarily rely on non-farm sources of income to repay their loans.

#### **Association Merger**

Effective December 1, 2023, two of the Bank's affiliated Associations, Ag New Mexico Farm Credit Services, ACA and Lone Star, ACA, merged and are doing business as AgTrust Farm Credit, ACA.

#### **Adoption of New Accounting Standard**

Effective January 1, 2023, the Texas District adopted the current expected credit losses (CECL) accounting guidance that replaced the incurred loss guidance. CECL established a single allowance framework for financial assets carried at amortized cost and certain off-balance sheet credit exposures, changing the impairment recognition model for available-for-sale securities. CECL requires management to consider in its estimate of allowance for credit losses (ACL) relevant historical events, current conditions and reasonable and supportable forecasts that affect the collectability of the assets. The adoption of this guidance resulted in a cumulative effect transition adjustment at January 1, 2023, reflecting an increase in the Texas District's ACL of \$12.3 million on outstanding loans and unfunded commitments and a corresponding decrease in retained earnings. The adoption did not warrant a cumulative effect transition adjustment for the Texas District's available-for-sale or held-to-maturity securities.

#### **Results of Operations**

#### Net Income

The Texas District net income of \$643.1 million for the year ended December 31, 2023, reflected a decrease of \$45.5 million, or 6.61%, from the same period of 2022. The decrease in net income was driven by a \$50.8 million increase in the provision for credit losses on loans and a \$21.0 million increase in noninterest expense, partially offset by a \$19.2 million increase in net interest income and a \$7.0 million increase in noninterest income. The return on average assets decreased to 1.41% for the year ended December 31, 2023, from 1.59% for the year ended December 31, 2022.

The Texas District's net income of \$688.6 million for the year ended December 31, 2022, reflected an increase of \$47.1 million, or 7.34%, over the same time period of 2021. The increase in net income was driven by a \$97.5 million increase in net interest income, partially offset by a \$35.1 million increase in noninterest expense, a \$13.7 million increase in the provision for credit losses and a \$2.0 million decrease in noninterest income. The return on average assets decreased to 1.59% for the year ended December 31, 2022 from 1.69% for the year ended December 31, 2021.

#### Net Interest Income

Net interest income for the year ended December 31, 2023, was \$1.14 billion, an increase of \$19.2 million, or 1.72%, over the same period of 2022, driven by a \$2.36 billion increase in Texas District average interest earning assets, partially offset by a decrease in the net interest rate spread. The decrease in the net interest

spread of 30 basis points during the year ended December 31, 2023, from 2.44% to 2.14% was attributable to a 176 basis point increase in the average cost of debt, partially offset by a 146 basis point increase in the yield on average interest earning assets. Net interest margin decreased by 10 basis points to 2.55% for the year ended December 31, 2023, compared to 2.65% for the same period of 2022 due to the decline in the net interest rate spread, partially offset by an increase in income earned on earning assets funded by noninterest-bearing sources.

Net interest income for the year ended December 31, 2022, was \$1.12 billion, an increase of \$97.5 million, or 9.57%, over the same period of 2021, driven by a \$5.17 billion increase in Texas District average interest earning assets, partially offset by a decrease in the net interest rate spread. The decrease in the net interest spread of 15 basis points during the year ended December 31, 2022 from 2.59% to 2.44% was attributable to a 68 basis point increase in the average cost of debt, partially offset by a 53 basis point increase in the yield on average interest earning assets. Net interest margin decreased by 10 basis points to 2.65% for the year ended December 31, 2022 compared to 2.75% for the same period of 2021.

During the twelve months ended December 31, 2023, the Bank called \$1.02 billion in debt and recognized \$915 thousand in accelerated interest expense compared to \$150.0 million in debt called and \$174 thousand in accelerated interest expense for the same period in 2022.

#### Provision for Credit Losses on Loans

As previously noted, effective January 1, 2023, the Texas District adopted CECL accounting guidance for determining the allowance for credit losses. Prior to January 1, 2023, the allowance for loan losses was based on probable and estimable losses inherent in the loan portfolio.

The provision for credit losses on loans for the year ended December 31, 2023, totaled \$53.1 million, an increase of \$50.8 million compared to \$2.3 million for the same period of 2022. The combined Associations recorded a provision for credit losses on loans of \$15.2 million for the twelve months ended December 31, 2023, compared to a loan loss reversal of \$2.3 million during 2022. The provision for credit losses for the combined Associations during the twelve months ended December 31, 2023, reflects credit deterioration in a few select borrowers which resulted in increased specific reserves, as well as increases in general reserves due to new lending activity. The Bank recorded a provision for credit losses on loans of \$37.9 million for the twelve months ended December 31, 2023, primarily due to the recording of specific reserves resulting from credit deterioration among select borrowers in the agribusiness, energy and production and intermediate-term sectors as well as an increase in general reserves due to more pessimistic economic forecasts than the prior year.

The provision for credit losses for the year ended December 31, 2022, totaled \$2.3 million, an increase of \$13.7 million compared to the \$11.4 million loan loss reversal for the same period of 2021. The combined Associations recorded a loan loss reversal of \$2.3 million for the twelve months ended December 31, 2022, compared to a loan loss reversal of \$14.4 million during 2021. The loan loss reversal for the twelve months ended December 31, 2022, reflected improvements in credit quality in select sectors of the loan portfolio. The Bank recorded a provision for credit losses of \$4.6 million for the twelve months ended December 31, 2022, reflecting an increase in specific reserves for two borrowers in the agribusiness sector as well as increases in general reserves due to isolated credit deterioration and loan growth.

#### Noninterest Income

Noninterest income for the year ended December 31, 2023, was \$98.0 million, an increase of \$7.0 million, or 7.71%, compared to the same period of 2022. The increase was driven by an increase in patronage income recognized from out-of-district participants.

Noninterest income for the year ended December 31, 2022, was \$91.0 million, a decrease of \$2.0 million, or 2.16%, compared to the same period of 2021. The decrease reflects lower fees for loan-related services.

#### Noninterest Expense

Noninterest expense for the year ended December 31, 2023 totaled \$537.0 million, an increase of \$21.0 million, or 4.08%, from the same period of 2022. The increase in noninterest expense was primarily driven by a \$9.3 million increase in other operating expenses reflecting the impact of the settlement of a contingent liability in December 2022 as well as increases in public and member relations expenses, travel and training expenses, a \$9.1 million increase in occupancy and equipment for software licensing and depreciation expense and a \$7.8 million increase in salary and employee benefits. These increases were partially offset by a \$2.5 million decrease in FCSIC insurance expense and a \$2.7 million decrease in purchased services.

Noninterest expense for the year ended December 31, 2022, totaled \$516.0 million, an increase of \$35.1 million, or 7.31%, from the same period of 2021. The increase in noninterest expense was driven by a \$20.4 million increase in FCSIC insurance expense premiums resulting from a premium rate of 20 basis points and an increase in adjusted debt obligations, an \$11.1 million increase in salary and employee benefits and a \$5.1 million increase in occupancy and equipment, partially offset by a decrease of \$6.4 million in purchased services.

#### Loan Portfolio

The following table summarizes Texas District loans by loan type:

| (in thousands)                               | Dec | ember 31, 2023 | December 31, 2022 | December 31, 2021 |
|--|-----|----------------|-------------------|-------------------|
| Real estate mortgage                         | \$  | 22,507,216     | \$<br>22,114,936  | \$ 20,906,907     |
| Production and intermediate-term             |     | 5,293,706      | 4,555,061         | 4,021,114         |
| Agribusiness:                                |     |                |                   |                   |
| Loans to cooperatives                        |     | 629,393        | 695,077           | 610,130           |
| Processing and marketing                     |     | 4,965,804      | 5,003,502         | 4,134,282         |
| Farm-related business                        |     | 579,206        | 623,805           | 557,816           |
| Communications                               |     | 1,180,113      | 1,134,299         | 926,645           |
| Energy (rural utilities)                     |     | 1,599,892      | 1,512,093         | 1,349,722         |
| Water and waste disposal                     |     | 423,731        | 248,392           | 164,665           |
| Rural residential real estate                |     | 263,188        | 281,281           | 287,703           |
| International                                |     | 157,693        | 128,201           | 94,384            |
| Mission-related                              |     | 29,869         | 34,635            | 41,758            |
| Loans to other financing institutions (OFIs) |     | 55,304         | 51,878            | 39,067            |
| Lease receivables                            |     | 35,560         | <br>38,284        | 40,996            |
| Total loans                                  | \$  | 37,720,675     | \$<br>36,421,444  | \$ 33,175,189     |

The Texas District loan portfolio consists predominately of retail loans. The Bank's loans to the Texas District Associations, also referred to as direct notes, have been eliminated in the combined financial statements. Total Texas District loan volume at December 31, 2023, was \$37.72 billion, an increase of \$1.30 billion, or 3.57%, from the \$36.42 billion loan portfolio balance at December 31, 2022. The loan volume increase during the twelve months ended December 31, 2023, was driven by a \$1.31 billion increase in the Texas District Associations' loan portfolios.

The Bank's capital markets loan portfolio, also referred to as participations purchased loan portfolio, predominantly includes participations, syndications and purchased whole loans, along with other financing structures within our lending authorities. In addition to purchasing loans from the Texas District Associations, which may exceed their hold limits, the Bank seeks the purchase of participations and syndications originated outside of the Texas District's territory by other System institutions, commercial banks and other lenders. The Bank's capital markets loan portfolio depends to a significant degree on other relationships with other Farm Credit institutions. These loans may be held as interest earning assets of the Bank or sub-participated to the Texas District Associations or other System entities.

#### **Portfolio Diversification**

Loan concentrations exist when there are amounts loaned to multiple borrowers engaged in similar activities, or within close proximity, which could cause them to be similarly impacted by economic or other conditions. While the amounts represent the maximum potential credit risk, a substantial portion of the Texas District's lending activities are collateralized and, accordingly, the credit risk associated with lending activities is considerably less than the recorded loan principal and is considered in the allowance for credit losses on loans.

Portfolio credit risk is also evaluated with the goal of managing the concentration of credit risk. Concentration risk is reviewed and measured by industry, commodity, geography and customer limits.

The Texas District's concentration of credit risk in various agricultural commodities is shown in the following table:

| (in thousands)                | Decemi | er 31, 2023 | Decen | nber 31, 2022 | December 31, 2021 |
|-------------------------------|--------|-------------|-------|---------------|-------------------|

#### Loan Quality

One credit quality indicator utilized by the Texas District is the Farm Credit Administration Uniform Loan Classification System that categorizes loans into five categories. The categories are defined as follows:

- *Acceptable* assets expected to be fully collectible and represent the highest quality;
- *Other assets especially mentioned (OAEM)* assets are currently collectible but exhibit some potential weakness;
- *Substandard* assets exhibit some serious weakness in repayment capacity, equity and/or collateral pledged on the loan;
- *Doubtful* assets exhibit similar weaknesses to substandard assets; however, doubtful assets have additional weaknesses in existing factors, conditions and values that make collection in full highly questionable; and
- *Loss* assets are considered uncollectible.

The following table shows the amortized cost of loans (principal balance adjusted for discounts, premiums, charge-offs, recoveries and deferred loan fees and costs) classified under the Uniform Loan Classification System by origination year as of December 31, 2023:

|                                   | Acceptable       |    | OAEM (Special<br>Mention) |    | Substandard/<br>Doubtful |    | Total      |    | Current Period<br>Gross<br>Charge-offs |
|-----------------------------------|------------------|----|---------------------------|----|--------------------------|----|------------|----|--|
| 2023                              | \$<br>4,905,277  | \$ | 42,717                    | \$ | 54,014                   | \$ | 5,002,008  | \$ | 1,601                                  |

| Total nonperforming assets                    | \$    | 170,557 \$    | 159,197           | \$ 92,141         |  |  |  |

The table below summarizes the amortized cost of the Texas District's nonperforming assets at December 31, 2023, December 31, 2022, and December 31, 2021.

The Texas District's nonperforming loans are composed of nonaccrual loans and accruing loans 90 days or more past due. Nonperforming assets consist of nonperforming loans and other property owned (OPO). Total nonperforming assets have increased by \$11.4 million, or 7.14%, from \$159.2 million at December 31, 2022, compared to \$170.6 million at December 31, 2023. The decrease in nonaccrual loans since December 31, 2022, largely reflects repayments from borrowers, transfers to other property owned in the real estate mortgage, production and intermediate-term and agribusiness sectors as well as charge-offs in the production and intermediate-term and agribusiness sectors.

At December 31, 2023, \$44.8 million, or 34.26%, of loans classified as nonaccrual were current as to principal and interest, compared to \$80.4 million, or 57.40%, of nonaccrual loans at December 31, 2022, and \$43.1 million, or 49.93%, of nonaccrual loans at December 31, 2021.

\*Prior to the adoption of CECL on January 1, 2023, the provision for the allowance for losses on unfunded commitments was included in the allowance for credit losses on loans and transferred to the allowance for losses on unfunded commitments. After the adoption of CECL, the provision for allowance for losses on unfunded commitments are included within that rollforward. Allowance for losses on letters of credit and unfunded commitments are recorded in other liabilities in all periods presented.

Loans, net of the allowance for loan losses, represented 81.90%, 81.51%, and 80.78% of total assets at December 31, 2023, 2022 and 2021, respectively.

#### Investments

The Bank is responsible for meeting the Texas District's funding, liquidity and asset/liability management needs. While access to the unsecured debt capital markets remains the Bank's primary source of liquidity, the Bank also maintains a secondary source of liquidity through a high-quality investment portfolio and other short-term liquid assets. The Bank holds these investments on an available-for-sale basis. Refer to the Bank's 2023 Annual Report for additional description of the types of investments and maturities. Additionally, the Texas District Associations have regulatory authority to enter into certain guaranteed investments that are typically mortgage-backed or asset-backed securities. The Texas District's investment portfolio is summarized in the following table:

| (in thousands)                         | Amortized Cost  | Unrealized Gains | Unrealized Losses | Fair Value |
|--|-----------------|------------------|-------------------|------------|
| December 31, 2023                      |                 |                  |                   |            |

| Total Texas District investments       | \$<br>7,393,790 | \$ 2,202         | \$ (608,018) \$   | 6,787,975  |
| December 31, 2021                      |                 |                  |                   |            |
| Bank investments                       | \$<br>6,590,103 | \$ 30,202        | \$ (60,066) \$    | 6,560,239  |
| Texas District Association investments | 120,735         | 888              | (110)             | 121,513    |
| Total Texas District investments       | \$<br>6,710,838 | \$ 31,090        | \$ (60,176) \$    | 6,681,752  |

The Texas District Associations' investments in the preceding tables include held-to-maturity securities with an amortized cost of \$2.4 million (unrealized net loss of \$71 thousand and fair value of \$2.4 million),

amortized cost of \$3.4 million (unrealized net gain of \$142 thousand and fair value of \$3.2 million) and amortized cost of \$6.1 million (an unrealized gain of \$108 thousand and fair value of \$6.2 million) as of December 31, 2023, December 31, 2022, and December 31, 2021, respectively. These securities are reported at amortized cost and included in investment securities on the balance sheets.

As discussed above, effective January 1, 2023, the Texas District adopted CECL guidance which amends existing impairment guidance for held-to-maturity and available-for-sale investments to incorporate an allowance, which will allow for the reversal of credit impairments in the event that the credit of an issuer improves. The Texas District did not have a cumulative effect transition upon adoption on January 1, 2023, in relation to investments and does not expect credit losses on a significant portion of its available-for-sale securities as a majority of the portfolio consists of U.S. Treasury and U.S. agency securities that inherently have an immaterial risk of loss.

The Texas District evaluated its investment securities with unrealized losses for impairment during the year ended December 31, 2023. As a result of the assessment, the Texas District concluded that it does not intend to sell any securities and it is more likely than not that it would not be required to sell any securities, prior to recovery of the amortized cost basis. The Texas District concluded that a credit impairment did not exist at December 31, 2023.

#### **Capital Resources**

The Texas District's equity totaled \$5.50 billion at December 31, 2023, including \$1.03 billion in preferred stock, \$72.8 million in capital stock and participation certificates, \$4.68 billion in retained earnings and \$254.9 million in additional paid-in-capital, partially offset by accumulated other comprehensive loss of \$544.3 million.

Borrower equity purchases required by Texas District Association capitalization bylaws, combined with a history of growth in retained earnings at Texas District institutions, have resulted in Texas District institutions being able to maintain strong capital positions. The \$5.50 billion capital position of the Texas District at December 31, 2023, reflected an increase of \$191.4 million compared to the capital position of \$5.31 billion at December 31, 2022. The increase since December 31, 2022, reflects a year-to-date income of \$643.1 million, a \$21.9 million decrease in accumulated other comprehensive loss and a \$32.9 million increase in additional paid-in capital related to the AgTrust Farm Credit merger, partially offset by estimated patronage payments of \$380.5 million and preferred stock dividend payments of \$65.4 million.

Following is a summary of the components of accumulated other comprehensive loss:

| (in thousands)                             | December 31, 2023 |              | December 31, 2022 | December 31, 2021 |  |
|--|-------------------|--------------|-------------------|-------------------|--|
| Unrealized losses on investment securities | \$                | (567,798) \$ | (605,817) \$      | (29,194)          |  |
| Derivatives and hedging position           |                   | 44,892       | 63,900            | (66,199)          |  |
| Employee benefit plan position             |                   | (21,440)     | (24,310)          | (63,405)          |  |
| Total Accumulated Other Comprehensive Loss | \$                | (544,346) \$ | (566,227) \$      | (158,798)         |  |

Accumulated other comprehensive loss totaled \$544.3 million at December 31, 2023, a decrease of \$21.9 million from December 31, 2022. The decrease in accumulated other comprehensive loss reflects a \$38.0 million decrease in unrealized losses on the Bank's available-for-sale investments, a \$19.0 million decrease related to changes in the valuation of interest rate swaps at the Bank and a \$2.9 million decrease in unrealized losses on pension and other postretirement benefit plans. All changes are primarily attributable to increases in interest rates.

The Farm Credit Administration sets minimum regulatory capital requirements for System banks and associations.

#### **Employee Benefit Plans**

The employees of the Bank and substantially all Associations participate in various defined benefit retirement plans. The defined benefit retirement plan is noncontributory and the benefits are based on salary and years of service. As of January 1, 1996, the Bank and Associations froze participation in their defined benefit pension plan and offered defined contribution retirement plans to all employees hired subsequent to the freeze.

In addition, the Bank and Associations provide certain health care and other postretirement benefits to eligible retired employees, beneficiaries and directors (other postretirement benefit plan). Employees may become eligible for health care and other postretirement benefits if they reach normal retirement age while working for the Bank or an Association. These benefits are not characterized as multiemployer and, consequently, the liability for these benefits is included in other liabilities individually for the Bank and each Association, as applicable.

Employees of the Texas District participate in either the Texas District's defined benefit retirement plan (DB Plan) or in a non-elective defined contribution feature (DC Plan) within the Farm Credit Benefits Alliance 401(k) plan (401(k) Plan). In addition, all employees may participate in the 401(k) Plan. As previously mentioned, the DB Plan is noncontributory, and benefits are based on salary and years of service. The legal name of the plan is Farm Credit Bank of Texas Pension Plan and its employer identification number is 74-1110170. Participants in the non-elective pension feature of the DC Plan direct the placement of their employers' contributions made on their behalf into various investment alternatives.

The Texas District also participates in the 401(k) Plan, which offers a pre-tax and after-tax and Roth compensation deferral feature. Employers match 100% of employee contributions for the first 3% of eligible compensation and then match 50% of employee contributions on the next 2% of eligible compensation, for a maximum employer contribution of 4% of eligible compensation.

Certain executive or highly compensated employees in the Texas District are eligible to participate in a separate nonqualified supplemental 401(k) plan, named the Farm Credit Benefits Alliance Nonqualified Supplemental 401(k) Plan (Supplemental 401(k) Plan). The Supplemental 401(k) Plan allows Texas District employers' election to participate in any or all of the following benefits:

- *Restored Employer Contributions* to allow "make-up" contributions for eligible employees whose benefits to the qualified 401(k) Plan were limited by the Internal Revenue Code during the year;
- *Elective Deferrals* to allow eligible employees to make pre-tax deferrals of compensation above and beyond any deferrals into the qualified 401(k) Plan; and/or
- *Discretionary Contributions* to allow participating employers to make a discretionary contribution to an eligible employee's account in the Supplemental 401(k) Plan and to designate a vesting schedule.

The unfunded status of the pension benefit plan decreased \$7.0 million, or 9.29%, compared to the prior year. The unfunded status of the other postretirement benefit plan increased \$1.7 million, or 2.78%, compared to the prior year.

The funding status and the amounts recognized in the combined balance sheet of the Texas District for pension and other postretirement benefit plans follows:

| (in thousands)                                     |                      |                        |              |
